### My vision on PLKLHT 2.0

My vision on PLKLHT 2.0 is on Anderson Road. There is plenty of space. The new site covers an area of a 7,000 square meters and is a "big school" that can build at least 30 classrooms. The area is about twice of the old school. It is really the "PLKLHT 2.0!"

The appearance of the school's colour will be rainbow because I think when students go in the school they will be happy to see this colourful building. The colour of the ground floor will be yellow. The first to fourth floors will be blue. The colour of the fifth to seventh floor will be red. The eighth floor will be my favorite colour orange. The ninth floor's colour will be purple. The colours of eleventh and twelfth will be violet.

I want to keep the facilities like the MMLC and Cal Lab computer room because computer technology is important for society nowadays. Of course, the teacher room and classroom, including the small group classroom will be kept. Otherwise, there will be no teachers to teach and no classrooms to use! I also want to keep the school's electric boards because they don't make me dirty when I am cleaning up compared with the traditional blackboard. But the most unexpected thing that you do not know that I want to keep is the lego steam sign just because I like it.

In fact, things that I want to remove is not too much because it keeps witnessing my growth. Maybe I'd want to remove the recently equipped plastic chairs and iron-wood tables. I don't like the chair's design because it's too short and the table drawer is too small. I would also remove the music room stair seat because it is too old and dirty.

At last, I would add some facilities like elevator and escalators because the new school has twelve floors. Students and teachers may feel tired to walk so many floors. The new school must have a swimming pool because LHT encourages students to swim. I also want to add an internet room. Inside, there would be smart TVs, iPhone and small computers etc. also, there will be detection room, playroom, canteen and cafeteria of course, don't forget to buy new tables and seats. The one I think a lot of students want to have but it won't have is the punish-teacher room Ha!Ha!

My reflection of the school is that each new school must be well-planned and must have the basic things. Otherwise, it will be big trouble to be run and we would need to re-plan again!

My vision on PLKLHT 2.0

In 2025, PLKLHT 2.0 will be built on Anderson Road. Although our P.5 students will become secondary school students, I still have some vision on PLKLHT 2.0. I think the basic information of the school is clear. But, I hope that the appearance of PLKLHT 2.0 will be colorful. It can make students feel happy.

I think PLKLHT 2.0 needs to add some facilities. First, we must add an elevator. The elevator helps pregnant teachers, injured teachers and students go to each floor easily. Second, we need to add lockers with locks. This can protect student's personal belongings.

Beside, PLKLHT 2.0 should remove the projectors and use the screen as teaching aids. The screen can provide students with clearer images. In addition, we must keep MMLC because we can learn more from computer learning.

PLKLHT 2.0 has good teachers, completes facilities and beautiful appearance students and parents must love it. I believe PLKLHT 2.0 will be the best.

### My vision on PLKLHT 2.0

Our school is going to expand its area. And the new location is Anderson Road Quarry. Here is my vision on PLKLHT 2.0.

PLKLHT 2.0 is not like our PLKLHT. It's bigger and everything is going to be better than now. In my vision, it will be coloured in orange and big. The gate will be made with wood. There are going to be ten floors and with a total of thirty classrooms and the staircases are going to be green as it can make our eyes better.

There is something I want to help. First, I will keep the library as it's still new and is a comfortable place for students to read. Also, the electronic white boards in classrooms will be kept. Therefore, the projectors can be removed as since we have the electronic white boards. We don't need to use it.

There is also something to remove. Since the fans and air conditioners are old and noisy, they will be removed and upgraded. Also, the speakers in classrooms should be removed too as nobody used them anymore. The lockers in classrooms will be removed and upgraded to expand and add looks to it.

The most important things is to add things to the new school. A garden and solar panels on the roof of the school will be good as it can promote green lifestyle. There will be a study room on the 9<sup>th</sup> floor and will be next to the library. It's going to provide a place for students to study exams, quizzes or do homework.

On the other hand, since my vision of the new school has ten floors, elevators are needed. CCTV will also be installed in every classroom so that our parents can see what we are doing during lessons and parent's day will be cancelled. A cafeteria is important too. If there is no food for the students, they can't eat at school. Moreover, an activity room for teachers and students to play games would be nice. Lastly, a sport centre is important. Students can have PE lessons there, and also to have special lessons there too.

I hope that PLKLHT 2.0 is like my vision, and I hope student in PLKLHT 2.0 will love their school and can learn happily in PLKLHT 2.0.

### Chinese New Year Holiday in a pandemic

Because of the pandemic, during this Chinese New Year we couldn't go on vacations. So, we had to stay in Hong Kong to have our Chinese New Year Holiday.

On the New Year's Day, my parents and I visited grandma's house. When we arrived, I said, 'Grandma, grandpa. Happy New Year!' They said, 'Happy New Year!' Later, my uncle and aunt arrived too, we had our lunch.

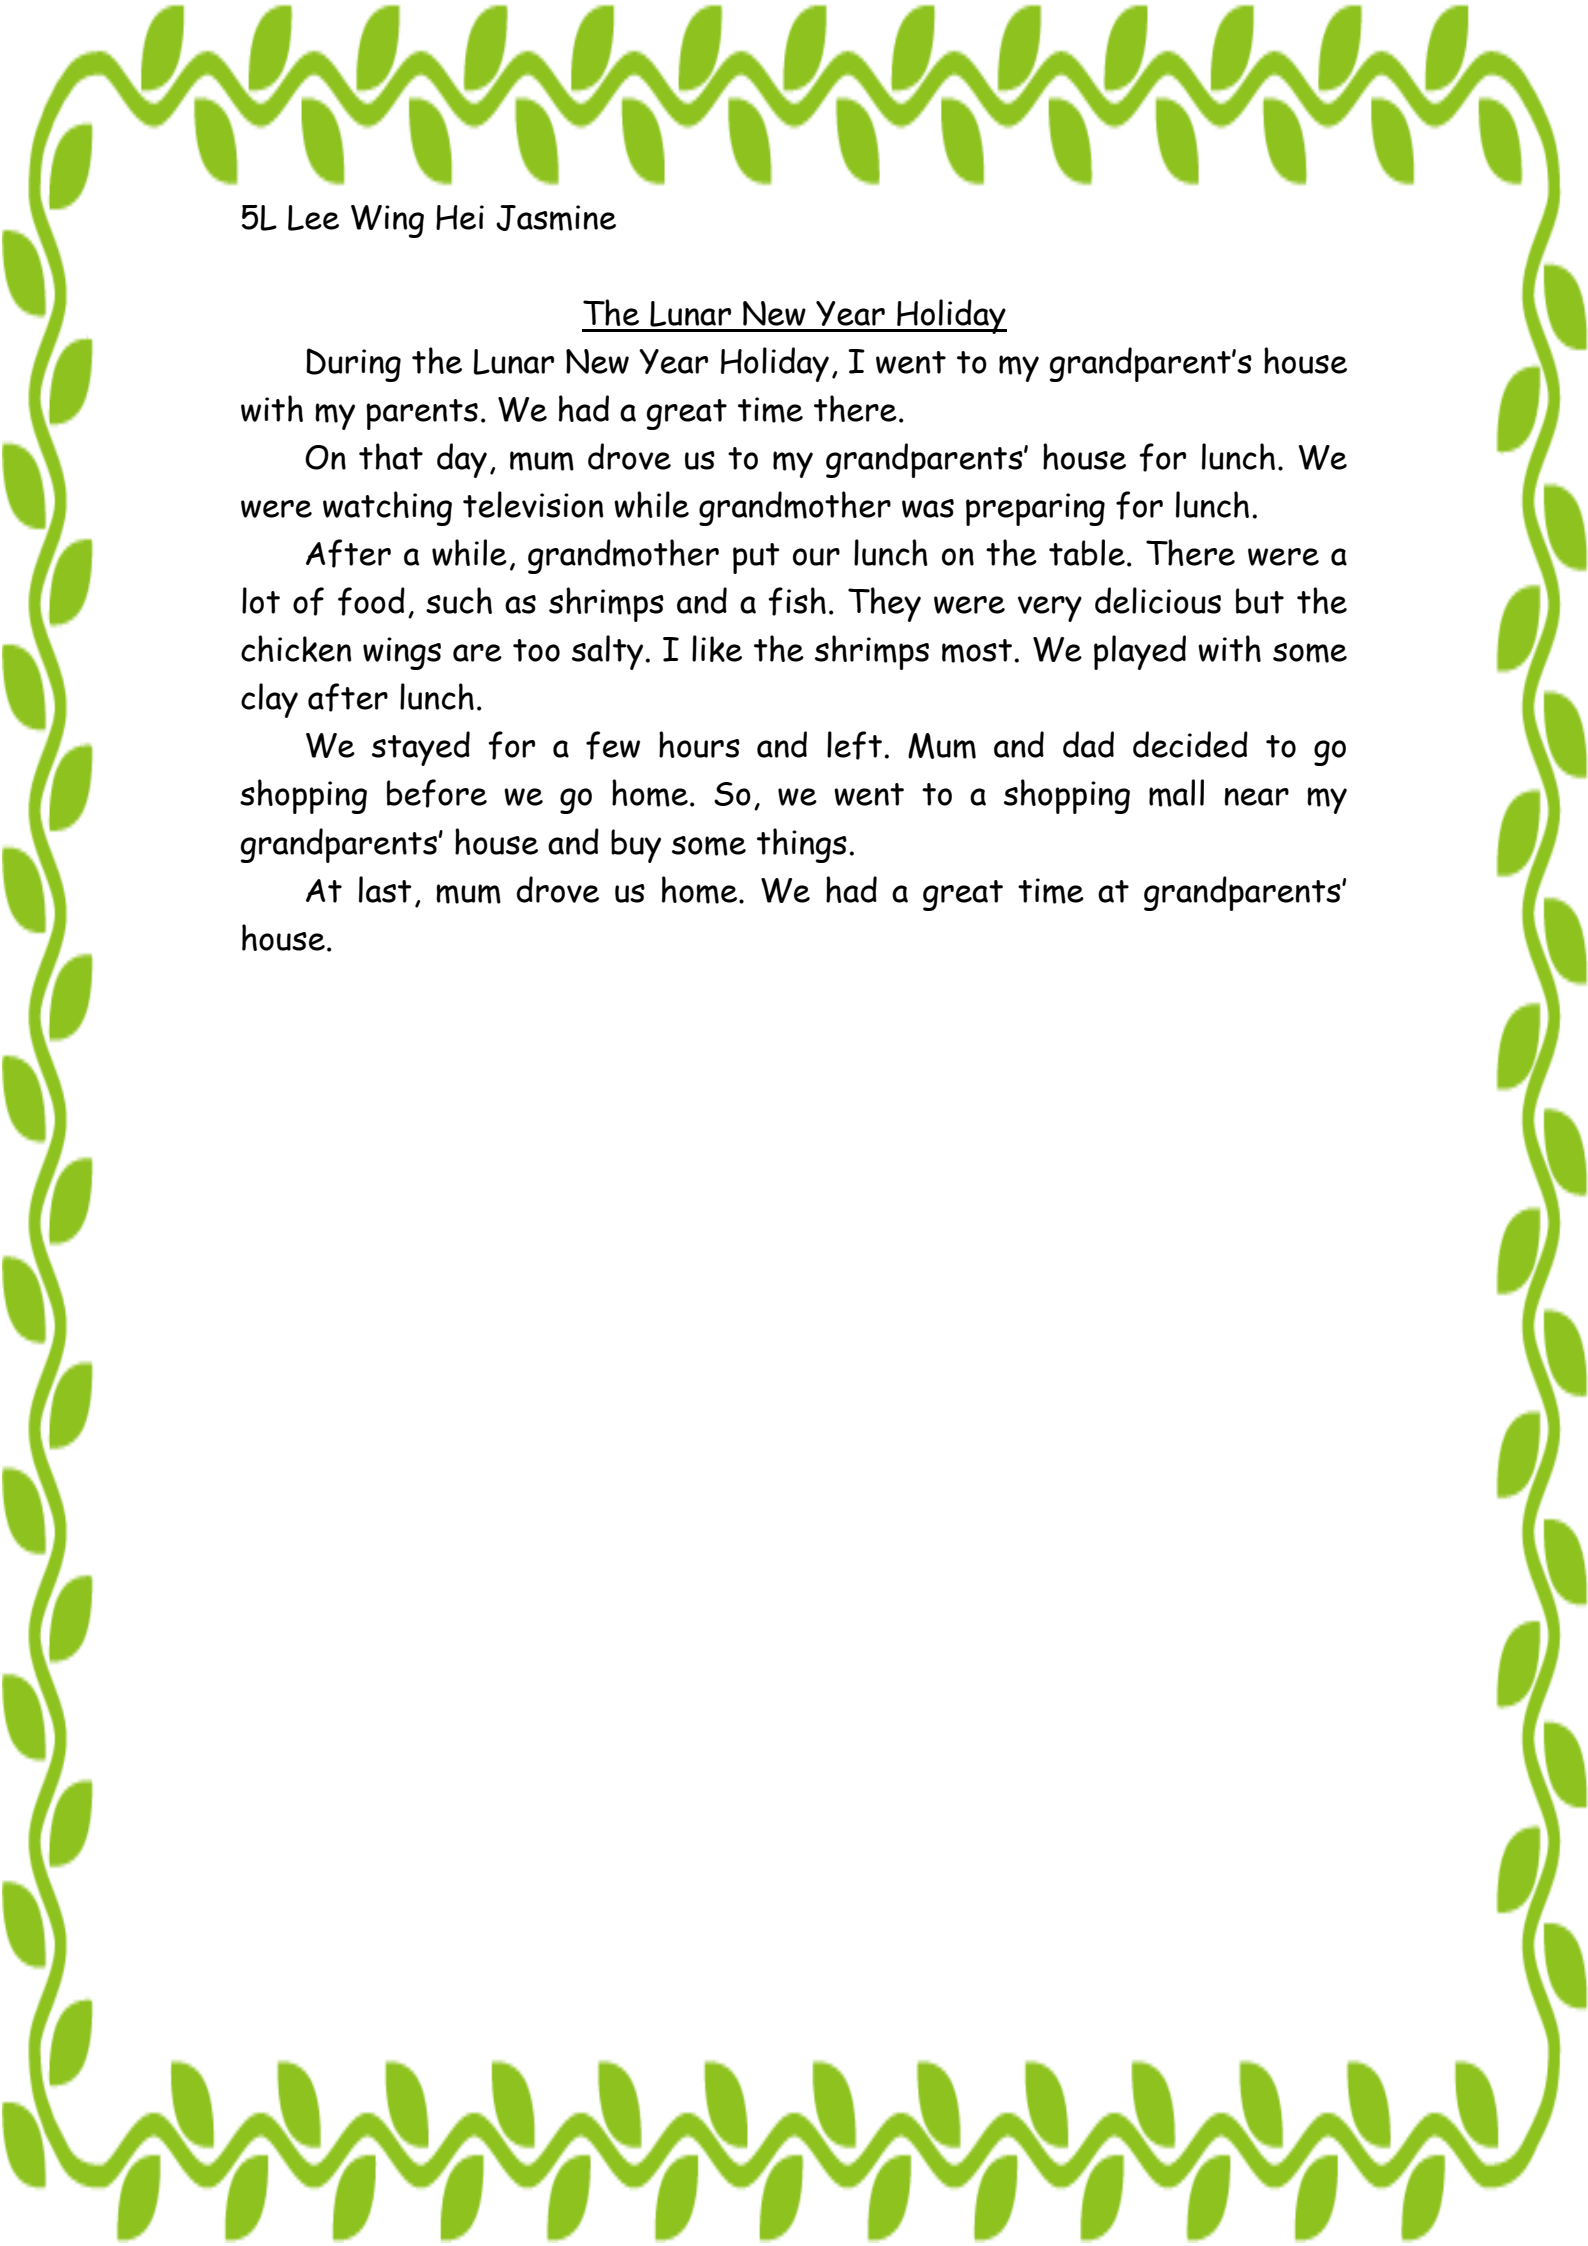

After lunch, we got our red packets from my grandparents. Adults played card games and children played Switch and marble games. Also, I ate some New Year food including carrot cake, fried pile and candies. We had a great time. At night, we said goodbye to me grandparents and left.

On the second and third day of Chinese New Year we stayed at home, watched movies, played weather. On the fourth day of New Year, my parent and I went to a temple for blessings. When we arrived it was already crowded.

It was eleven o'clock when we arrived there. We knew it would took us hours staying under the sun, and we might get heatstroke too! So we decided to take shift: one team was going to have lunch, the another team was going to queue.

After hours of taking shifts, it was finally our turn. I made a wish to my parents, hoping all the family members including me to be healthy. Then, we left.

To conclude, although we didn't go on vacations, I had a great time during this holiday. Furthermore, I hope the pandemic will disappear soon.

### The Lunar New Year Holiday

During the Lunar New Year Holiday, I went to my grandparent's house with my parents. We had a great time there.

On that day, mum drove us to my grandparents' house for lunch. We were watching television while grandmother was preparing for lunch.

After a while, grandmother put our lunch on the table. There were a lot of food, such as shrimps and a fish. They were very delicious but the chicken wings are too salty. I like the shrimps most. We played with some clay after lunch.

We stayed for a few hours and left. Mum and dad decided to go shopping before we go home. So, we went to a shopping mall near my grandparents' house and buy some things.

At last, mum drove us home. We had a great time at grandparents' house.

### My Vision on PLKLHT 2.0

Po Leung Kuk Luk Hing Too Primary School is going to move 2025. Here are some of my thoughts about 'PLKLHT 2.0'.

Originally, PLKLHT Primary School has 8 floors, 24 classrooms and some special rooms such as the library and the music room.

First, about the new appearance of 'PLKLHT 2.0', there will be 11 floors, 36 classrooms and painted mostly in yellow and orange. The gate will be in yellow. I believe that anyone who has gone through the gate will be happier as it is in bright yellow.

Then, I think we should remove some equipment, such as the projectors because we already have a screen behind the blackboard. We won't need them anymore. Also, we have to remove the kiosk and change it into a Cafeteria as it is too small and there are only a few kinds of snacks.

Next, we must add new facilities, which are two lifts for students and teachers respectively and two CCTVs on the gate and in the concourse. We need lifts because students and teachers will be exhausted when going upstairs. Furthermore, we need CCTVs as we can track the thieves if they come and steal things in the school.

In addition, we should add a study room with computers for studying, a football pitch and a swimming pool. If we have a study room, we can use them to search for information when doing projects. A football pitch should be added so we don't have to rent the pitches outside. We can play football in our school. The same reason for the swimming pool, we can swim in our school without renting any swimming pool outside.

Lastly, I would like to make the science room bigger, almost as big as the library now, so we can keep more useful teaching materials and do more experiments at once.

To conclude, we can add more useful facilities to improve school life. And it would be so much fun with all the new resources in 'PLKLHT 2.0', where our junior students will enjoy so much. Also, I am looking forward to see it happen though I will be an alumni by then.
