A Diary

Dear diary,

Today is the third project day. Primary 1 and 2 students played games on the ground floor and they left at 1pm. And P.3 to P.6 students did some projects according to the assigned topics and left school at a quarter to four.

I'm in P.4 now and our topic is 'Charlie and the Chocolate Factory'. Some of my classmates and I need to do a drama. Others need to make props, write scripts and make the games. Therefore we were divided into four groups. I'm in the drama group and I need to be a squirrel. Well I only had a sentence to say. It is 'Gee, gee...gee'. I think it will be so funny! My groupmates may need to film the drama tomorrow. I did better pack my costume into my schoolbag.

Good night.

Project Day

In this year's project learning, all Primary 4 students are learning about a famous story and turn it into a play. The story my class chooses is 'Charlie and the Chocolate Factory' written by Roald Dahl.

Miss Ho, Miss Lam, Miss Calista and Mr Hunt lead us to do the project. Every student has different jobs. Some of us adapt the story and write the script, some of us make props for the play, some of us make games for audience to play and some of us act in the play.

I have found that besides learning about the famous story, we also learn to work with others. I think it is important to listen to others and be open to others' opinions if we want to work well with others.

The Showcase day will be in the coming February. I hope our play will work well that day and I hope the audience will like our show so that we can win.

An Unforgettable event in the summer holiday

Last Sunday, I went to Science Museum with my father. We were so excited and happy. We went there by bus because we just needed to walk to the destination only for two minutes. However if we took MTR, we needed to walk under the hot sun for more than ten minutes.

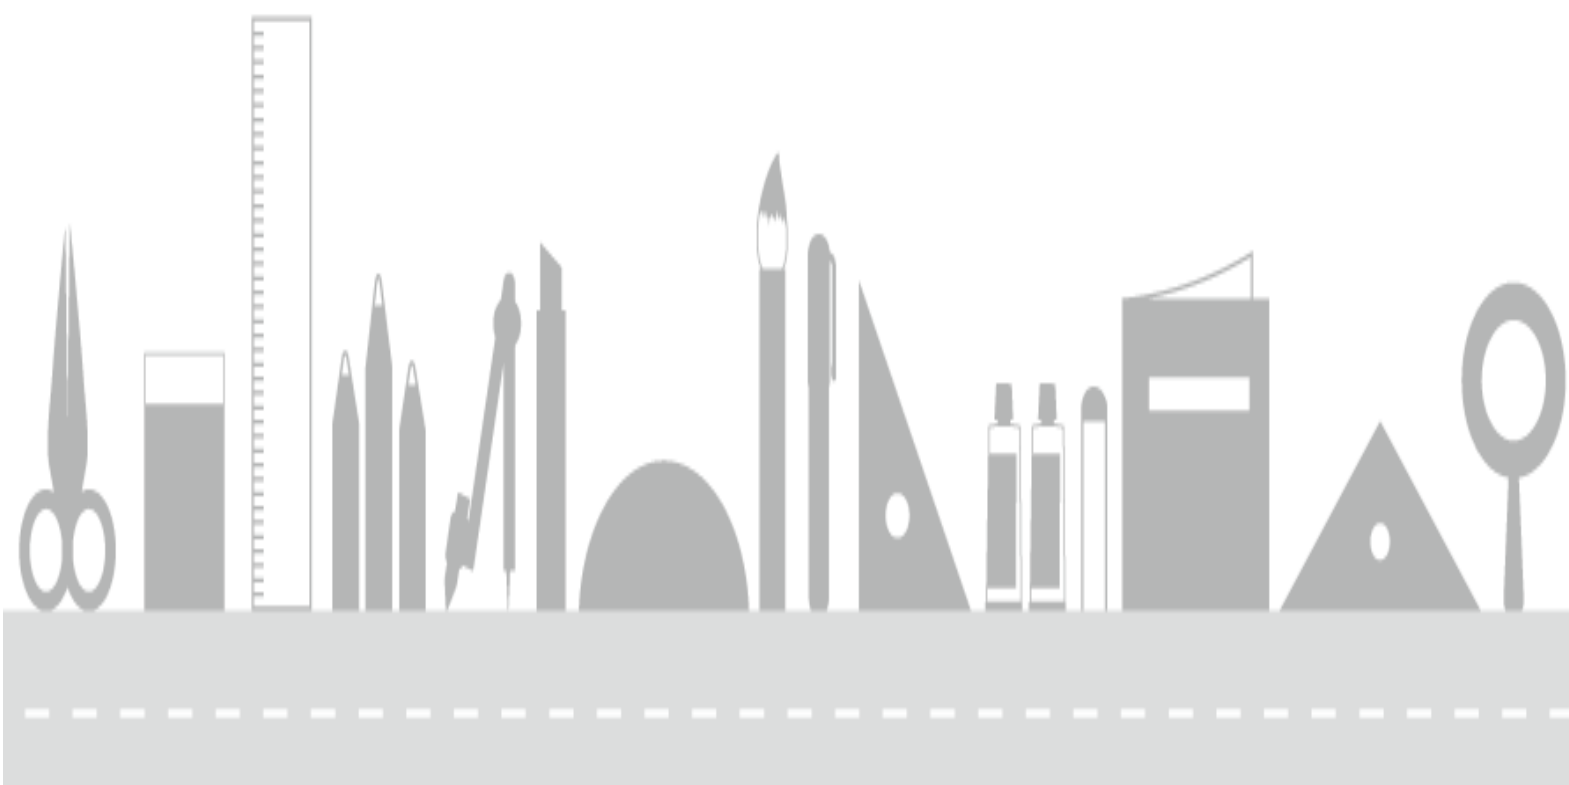

During the journey, my father told me that the Museum of History was just next to it and we could go there after visiting the Science Museum.

When we arrived at the museum, we bought the tickets at the counter. When I first stepped into the hall, I saw a big human hamster wheel for visitors to try and run. I tried and loved to play on it because it could change the kinetic energy to electricity. My father and I ran it for three times.

It was time for lunch. We went to a restaurant which is nearby and we enjoyed delicious spicy noodles.

After lunch, we went to the museum of the History. It was entrance-free for us because we bought annual pass. After visiting the museum, we bought a packet of UNO. Then we went back home.

I felt very happy because I learnt science and history knowledge from visiting the museum with my father.

An Unforgettable event in the summer holiday

One afternoon, my family and I went cycling. We went cycling on a track.

We got on the bikes and started cycling. At first, I was behind everyone. Then I went past them one by one and then I became the first one! After we went up a slope, my brother felt very tired. I also felt a little tired, so we took a rest near the track.

After that, we got on the bikes and continued. Later, I was a little bit hungry but I didn't bring any food.

In the evening, we got back home. I felt so happy after that day because I do not usually go cycling. It was unforgettable. I hope I can go cycling again.
