An Unforgettable Trip

Last summer, my parents and I went to Europe. First, we went Italy. The most beautiful city is Venice. We took the water buses and a water taxi to go up and down the Grand Canal and to the surrounding islands. It was very fun! Burano and Murano are two famous islands in Venice. In Murano, people could watch some workers blowing glass products. In Burano, there were many colourful houses. Besides looking at some beautiful places, we rode on a gondola. The Italian sailor was very handsome!

Then, we went to France. In Paris, my favourite scenic spot is Eiffel Tower. We took elevators to the summit of the tower. We could see the whole city of Paris up there. It was so spectacular! Arc de Triomphe is also a famous tourist spot and it is very huge!

At last, we went to the United Kingdom. We visited Tower Bridge and rode on the London Eye. The scenery was magnificent! However, I love watching the football match between Manchester United and Chelsea more. It was an exciting game! Rashford scored two goals and James got one goal. My favourite player Martial scored one goal too. Manchester United won the game, 4-0. I was so excited and very happy because Manchester United is my favourite team! Yeah!

I wish to travel again soon!

My Unforgettable Activity

I joined an art workshop in my summer holiday. It was held by the New Square Organisation. Because of the coronavirus pandemic, the workshop was changed to an online class at home.

The workshop was about making items with recycled materials. During the online workshop, I made some items, such as a pencil case. I used some recycled cloth to make and decorate it. Besides, I made a storage box with some recycled cardboards. I also made some beautiful stickers to decorate it with my mum. It was so interesting!

In conclusion, I think this online workshop was fun and it has taught me about being environmental friendly! I wish to join it again!

An Unforgettable Event in the Summer Holiday

Covid-19 roamed Hong Kong during the summer holiday. It was really an unforgettable event in my life.

It was unforgettable because I was stuck at home throughout this summer holiday. I couldn't have any regular training in ice hockey in an ice rink. Therefore, my dad bought a slideboard on the 1st of August for me to exercise at home. My dad accompanied me during my home training. I practised sliding sideways on the slideboard every day to imitate the actions on ice. I really enjoyed it!

The 23rd of July is my birthday. This year, I couldn't have my birthday party. It has never happened before. I couldn't invite my friends to celebrate my birthday because of that hateful Covid-19! I was very sad... As a result, my mum and dad cheered me up and took me to Tsim Sha Tsui, where I had my lunch. The food was yummy! The best thing was that, at last, I could step my foot out of my place! While I was enjoying my lunch, to my surprise, Ms. Lee called me and said "Happy Birthday!" It was very touching!

This summer holiday was fun even when it was in the midst of covid-19. I cannot wait for the next summer holiday to come!

Summer Holiday

Because of Covid-19, my planned overseas trip with my cousins' family was cancelled. Therefore, I invited my cousins Hayden and Marcus to stay at my home for two weeks.

During the holiday, we played a lot of games, such as board games and TV games. We felt very excited when we played the physical fitness challenges. We also made pancakes for breakfast and sushi for dinner. They were very tasty!

In addition, we went to a pond in the countryside for hiking. The scene was beautiful and the pond was surrounded by lots of trees. We all had a relaxing day! Though I stayed in Hong Kong during the summer holiday, I have got many unforgettable memories with my cousins during their stay. I enjoyed it very much. I look forward to having a wonderful trip in the next year!

Summer Sleepover

On the 25th of July, an unforgettable thing happened! My friend came to have a sleepover for the first time. He came at noon and so, we had homemade burgers for lunch. They were very delicious! After lunch, we chatted about our hobbies.

After our chat, we built a "tent" with our blankets. It was a lot of fun building it! Then, we played games, such as Monopoly and card games in the "tent". That was a lot of fun!

At night, we had omurice for dinner. It was our favourite course throughout the whole sleepover! Then, we watched some videos and went to bed.

The next day, after breakfast, we used the pictures from the first night and our computer to make a video to record our sleepover experience. In the process, my friend helped me choose the pictures and decide where to put them in the videos. I added some special effects in and my sister typed the script. Later, we recorded the video together. After that, my friend went home. I sent him the finished product and he said great!

What a joyful sleepover!
