

5L Chan Chak Kiu Ambrose

Self-reflection

This year is my fifth year in this caring, harmonious and pleasant school. So far, I have been polite to teachers and friendly to classmates. Comparing to last four years, I have more confidence in the use of English. So, my marks in English tests have risen a lot.

My goals in P.5 are to get higher scores in Maths tests and exams, learn more skills in drawing, play musical instruments and gain admission to join the school football team. To achieve these goals, I will try to be more careful, thoughtful and hardworking when doing homework and assignments given by my teachers and coaches. Also, I will take my mother's advice to allocate appropriate time to prepare for exams, to play, to relax and to take rest. As I just got a distinction in the percussion exam, I wish to enhance my skills in timpani so that I can play it in an orchestra someday. Besides, I have known little about the living of people in nearby cities through reading news and therefore, I want to learn much more about their culture, history and economies through reading books and travelling. By the way, for making new friends, I want to know more about the schoolmate who is sitting next to me in the school bus. I want to know more about him because I don't know why he likes buses so much. He always gets very excited when he sees new buses. Also, I don't know why he always pretends to sleep. He is an interesting boy!

Winstons Churchill once said, "Success is not final, failure is not fatal, it is the courage that counts!" Even though I got better grades in music and English exams recently, I still have to keep up my efforts to meet new challenges. I always use this motto to encourage myself.

Self-reflection

I am a P.5 student now. When I look at the past, I noticed some great changes. Comparing to P.1 to P.4, I improved my behavior, from being naughty to being a mature student in P.5. I also improved my attitude from being a playful student to a mature and serious student.

In P.5, my goals are getting 90 marks or above in every subject and learning new things in 2020. I hope to learn a new language, Japanese. I want to know more about and make friends with Regan because I admire his learning ability and attitude. He has excellent academic result.

In P.5 and the coming years, I will use an inspiring quote as my motto, “start where you are, use what you have, do what you can.” This is from a famous professional tennis player, Arthur Ashe. I think this quote is useful to me because I need to treasure what I am having now and use them thoroughly.

Self-reflection

I admit that I am a naughty person. I always play, talk and shout. Sometimes, I'm a shirker. When facing difficulties or something I don't like, I become slack or not positive. I will play and daydream. However, comparing to P.1 to P.4, I think I have improved a lot! Although I still play and talk to others during lessons, I can listen to the teachers most of the time. On the other hand, I love helping teachers. When I help teachers, I feel happy.

I set some goals for myself in P.5. I want to be more self-disciplined to avoid punishment. So, other people will change the perception of me from very naughty to not so naughty. Also, I want to be smarter. Besides, I want to learn and try some new things, like playing table tennis, so I can have a new hobby. I hope to challenge a great player one day.

“Ability is what you're capable of doing.

Motivation determines what you do.

Attitude determines how well you do it.”

(Lou Holtz)

“Excellence is not a skill, it is an attitude.”

(Marston)

These quotes can remind me that I need to do the things well and be positive.

Self-reflection

I am a P.5 student, I must have good behavior and attitude. Let me tell you something about it. I go to school punctually and speak to my teachers politely. I also do my homework carefully and take good care of my young brother at home. Comparing to P.1 to P.4, I have changed a little bit. Now, I get up earlier. At school, I get on well with my classmates. Before exams, I do my revision more attentively.

This year, I will work harder to get Progress Awards in English and Maths. I also want to perform well in clarinet. In 2020, I want to learn magic because it is a wonderful performance which makes people happy. Regan is my classmate who I want to make friends with. It is because he is hard-working and clever. He is my idol!

“Youth is the time to learn.” It is an inspiring quote to me because I must be hard-working and learn more now. “Knowledge is power.” If I am knowledgeable, I can help people, especially the poor.

L Lam Man He

Self-reflection

In general, I have improved a lot in terms of my behavior and attitude. In P.5, I think I'm helpful and kind because when someone asks me how to answer the questions, I will give hints instead of answers. Also, I respect teachers and I always help teachers carry homework and help them pass the messages to classmates. I'm more responsible than I was in P.4. I often do revision, hand in homework and go to school on time.

Although I often pay attention in class, there are still some questions I don't understand. I will ask the teachers after lesson because I want to excel in all exams.

I have improved in English and Science because I work harder now. Also, I like the teachers who teach me English and Science because their teaching is more interesting than that of the teachers in P.4.

There are a few things I want to achieve in P.5. In terms of skipping, my goal is to do the double under 10 times in a row. Also, making friends with my English teacher is my target.

There is a saying that goes "Actions speak louder than words." It's very useful to me because I always think but I don't act it. I hope that I can do better in the second term.

5L Pang Chun Yat Andrew

Self-reflection

Time flies. I have been studying in Po Leung Kuk Luk Hing Yon Primary School for five years. I am an upper primary student in P.5 now. In the last four months, I started to check my homework and do revision by myself. It can reduce the workload for my parents, letting them to have more time to take care of my little brother in P.3. Comparing to last four years, my parents helped me a lot on my studying. Now, I don't need much help from them.

In P.5, I want to improve my concentration on learning and I hope to get higher marks in all the subjects. These are my goals and I am trying my best to achieve them. On the other hand, I want to learn more computer knowledge such as using app inventor to develop applications. I also want to make friends with those classmates who were not in the same class with me before.

I believe that "mistakes are proof that you are trying". This quote tells me that we should keep trying and do not be afraid of making mistakes. We can succeed when we gain more experience.
