Writing a letter to myself

Dear Karl,

How are you? I am writing a letter in 2021.

From now, my dream is to be a basketball player. Did you fulfil my dream? Even if you didn't become a basketball player, it's not a big deal. Did you continue to play basketball?

Indeed, I practice basketball every Sunday with my friends. I am working hard to become a basketball player. I am going to endure to play basketball during the summer holidays.

I also have other hobbies, such as skateboarding, making websites, being a Youtuber, and so on.

According to my schedule, I go skateboarding twice a month. I usually go with my family, but I rarely go with my friends.

Besides, I upload a Youtube video for at least once a week, but I sometimes upload more than one video a week. All of these activities are fun.

Regards,

Karl (2021)

An unforgettable Event

Yesterday was my birthday. My mom had a day off because she wanted to accompany me and prepare for the small birthday party.

Mom bought all the food I like. I had spicy noodles and chicken for lunch. Mom also prepared curry for our dinner. Dad promised to buy me a birthday cake. I hope it was a chocolate flavor. When dad got home, I found that I was right. Yeah!

We finished our dinner quickly. We were about to start the birthday party. Suddenly, mom and dad went to the bedroom. They came out with a big box of Lego Harry Potter Castle! Hurray! This was the present I wanted for a long time. What a big surprise! I was speechless.

Then we sang a birthday song. Then I made a wish and blew the candles. You guess what was the wish I made? Of course I want to become taller. The reason was that I was far too short.

This year I could not celebrate my birthday with my friends, but I celebrated with my family at home and I had a surprise birthday present. It will be an unforgettable birthday ever.

Buddha's birthday

Life under COVID-19 is very boring because I cannot go out to play and have fun. Most of the time I need to stay at home.

At home, I watch TV. I watch cartoons and movies. Indeed, I love watching movies because they are exciting. Not only that, I can learn different kinds of things from the movies. The second thing I like to do is reading books. Reading books is good to us, so I spend a lot of time reading Chinese and English books. I hope my English will improve from time to time.

The third thing I like to do is playing on my mobile phone. Luckily, my mom allows me to play for fifteen minutes every day. There are two games, which are Gundam game and a car game. I love these games very much because they are very fascinating.

Nevertheless, I am really sad and disappointed. The reason is that I cannot go outside and play with my friends during this summer holiday.

Hopefully, Covid-19 will be gone soon. Therefore, everyone can have a normal life.

My Learning Log

Next year, I will be a Primary Five student. Time flies.

I like PE lessons. I wish that we could have PE lessons every day. During regular PE lessons, we do fun activities, like tag. We run in the covered playground. We also play table tennis, football and basketball. I think I am a sporty and energetic girl.

For the extra-curricular activities, I want to join choir, "App Inverter" and football team because I love singing, coding and playing football.

In addition, I will study hard for my exam. I hope my school life will be fun and fruitful. I will never stop learning interesting things every day.
