### **Project Day at school**

Last Friday, we had Project Day at school. It was about acting a drama about how a Chinese emperor, Yu solved the flooding problem. After Yu successfully controlled the massive flood, Shun gave the throne to Yu. Everyone liked him.

After we learned a lot about Yu, we started writing a script with iPads. We all worked on the same document with different iPads. It was a mess! When we all tried to type, the document would have multiple words appeared at the same time. When we tried to delete some words, multiple words were being deleted. The biggest problem was to type fast. The network could not support when too many people typing at the same time. When I typed a word, I needed to wait for several seconds. There were even some naughty classmates destroyed our work! They even deleted everything and quarreled with others! After one whole day of hard work, we finished and fixed the script eventually.

After the first Project Day, I learned that we needed to have team spirit. If we don't work together well, we will never succeed, but only quarrel and lose.

### **Swimming Gala**

Last Thursday, I went to the swimming gala with my mum. The weather was fine, so it was very hot. I sweated a lot.

At eight o'clock, we went into the spectators' stand at TKO Swimming Pool. When we sat on the seats, I saw a lot of people swimming in the pool. They swam very fast! Then the gala started. The principal said, "Welcome to join the 13<sup>th</sup> LHT Swimming Gala. The gala will start soon. Please remain seated quietly." After that, some swimmers came out. The race was going to start. I was excited! I cheered for Yellow House. Unfortunately, I felt dizzy suddenly and had a headache. I went to the first-aid station. The lifeguard in the room was very helpful. He let me sit down on a chair in the room. Then he helped me measure the blood pressure and heart beat with a machine. He told me, "Your blood pressure was a bit high and that's why you felt dizzy." At last, he sent me home.

In this swimming gala, I felt excited but a little bit sad because I felt dizzy in the middle of the race and so I couldn't cheer for my House. On the other hand, I learnt that I need to be helpful, otherwise the others won't help me when I need help.

### **Two-day trip to Macau**

My family and I went to Macau on the first day. We were so glad. The hotel I stayed at in Macau was so big and luxurious. There were a lot of hotel facilities and I liked the swimming pool the most because swimming can make me strong.

We had dinner with my father's friends together at night. We had the most famous meal in Macau – Portuguese cuisine. We ate 'Bacalhau', duck blood meal, suckling pig, etc. And I liked 'Bacalhau' the most because it tasted special.

My father and I went to the hotel swimming pool to swim in the next morning. It was so big and grand. We were so relaxed and enjoyable. After that, we bought some souvenirs and ate Turkish ice-cream. It was soft and delicious. We went home by ferry in the afternoon.

The two-day Macau trip was so interesting and memorable. I hope I can go to Macau again and visit the scenic spots that I have not been before.

### **The Happiest Day in this summer**

I had a wonderful summer holiday with a lot of activities, but my happiest day in this summer holiday was the fifteenth of August. Do you know why? It was because it was the second time I played Zipline and the first time I climbed onto treehouses.

On the fifteenth of August, I went to a place called “Treehouse”. In there, I could play Zipline, climb up the treehouse and feed fish. I went there in the morning, I played Zipline first. I stood on a platform up on a little hill, coupled onto a wire, then slid down the hill. It was exciting! However, the Zipline I played in Korea last time was much more exciting than this one. The one in Korea was higher and longer. I could feel more winds blowing towards me. After that, I climbed the treehouse. First, I climbed up a ladder made by natural tree branches. I climbed up carefully although I had a safety wire attached onto my body because I was very high up the tree! I was a little bit scared up on the treehouse. Then, I went down the treehouse by sliding down a tall pole. It was a scary, but very unforgettable memory. I liked it very much!

I had a ton of fun in “Treehouse” because I could play a lot of interesting games in there. It was a lively and amusing place. It made my summer holiday more fruitful and fun. I look forward to having another wonderful summer holiday.
