The interesting summer vacation

School was off! We had the summer vacation earlier because of the COVID - 19. Therefore, I could relax myself from the busy school life and have more time staying at home to try something new.

During this dull holiday, I tried cooking with my mum. In the kitchen, we made some desserts we like, such as fry egg with crab meat. They were fried until golden brown. Yum! We also shared them with our relatives.

Besides, I learned to do housework. I make the bed, hanged my clothes and tidied the shelves. I turned the messy shelves into a tidy one. I felt tired but happy.

Finally, we bought a mic from Shum Shui Po for singing songs. We listened to songs on YouTube and practised singing skills. In the videos, the musicians played the guitar and the piano to sing along. It was fantastic and awesome.

During the summer holiday, I thought we should cherish our family time. Also, we could learn what we could not learn from school. I figured out that we could learn knowledge in different ways.

I am delightful during this holiday.

A Special Summer Holiday

Due to COVID - 19, we could not play outside and I had to stay at home during the summer holiday. So my mother bought all Harry Potter's movie CDs for me to spend time.

I think the most interesting movie is 'Harry Potter and the Goblet of Fire!' In the movie, there was a competition called 'The Triwizard Tournament'. In the competition, there were three rounds. In the first round, participants need to find a golden egg, but they need to be careful because there is a dragon chasing at that time. In the second round, participants need to dive in the sea and save their partners. In the last round, participants need to go to a maze and get the trophy. Harry touched the trophy and he went to a graveyard. Harry met his enemy, Voldermort. Voldermort wanted to kill Harry, but Harry touched the trophy again, Harry went back to the competition place, Hogwards. At the end of the Tournament, Harry Potter won the first place. He was pleased and all the students were proud of him.

To conclude, I think this summer holiday is very interesting and fruitful, because I learned many English from these movies and I made a Harry Potter wand by a chopstick. My sister and I want to know more about these movies. Therefore my mother bought some Harry Potter series books for us. When I have money, I want to go to the Harry Potter Museum in England and buy a real Harry Potter wand.

Donglong Island Day Tour

On 15th August, 2020, my friend Jayden and I went to Donglong Island, we were very excited to go to there that day.

At first, we got on the ferry, it was very old but it was quite fast. On the way, we felt the strong sea breeze.

When we got off the ferry, we saw a big map, Jayden's father said we could go to the Hen Hill first. We walked a few mountain roads and it was about fifteen minutes. Finally we arrived at the Hen Hill. It looks like Amah Rock, we went to the rock's bottom. It was very cool because it was windy

Then, we were very hungry, we stood onto a safe rock and took beautiful photos. We ate egg noodles in a food shop. The noodles were very yummy and they filled us up with energy.

The next attraction is Spring Rock. Jayden's father said, 'We can catch the crabs and sea cucumber!' When we got there, we jumped into the water and started to catch the crabs, the crabs were very cute and small, so we put them in the bottle. At last, we released them and put them into the water.

Finally, we took more photos and got on the ferry, I told Mum, 'I must come to Donglong Island again next time!'

My favorite toy

My favourite toy is fun and creative. It is not only for children, adults can also play with it too, it's called Lego. It is a Danish toy company. It is made up of colourful plastic blocks, gears, minifigures. Various combination are available for users to build and create own buildings and designs.

I like to play Lego because I can build my unique buildings. There are many exclusive minifigures. When I was five, I started to play Lego, I have already got more than 40 minifigures and 4 boxes of Lego bricks. I feel it eases my mind and makes me feel more comfortable when I am not in a good mood. I play Lego when I am free. Sometimes, I play with my friends or play myself. In this month, I am drawing a Lego book, it is about Lego's history and some building secrets.

Toys are not only for playing, they also cure our mood. We should treasure them and do not throw them away easily in order to get a new one.

One day trip in Mui Wo

In the morning, my family and I went to Mui Wo.

When we arrived there, we rented four bicycles near the pier. We rode at the cycle track for almost one hour. Suddenly, my mum had an idea. She said "Why don't we cycle on the hill?" We all agreed. After a while, we cycled on the hill. There were many beautiful flowers and grass. A while later, we found a waterfall in a map. It sounded interesting and we decided to have a glance there. I heard that many dogs were barking when I rode past though them.

After half an hour, we arrived at the waterfall. It was amazing and we took a lot of photos. My brother and I played in the water. There was a little waterfall and we played it as a slide. It was great! I also swam there, it was fantastic! After that, I played a water fight with my brother. I won because I kicked the water harder. After an hour, it was time to leave. We rode the bicycle back to the cycling track and returned the bicycles. Also, we had ice-cream before we left, it was delicious.

I was glad to have a wonderful one day trip. It was the first time I cycled on the hill though it was really hard. I like to play in the water because the water is cool. I am looking forward to playing in Mui Wo again.

A day in Legoland

Last year, my family and I went to Legoland in Japan. It was really fun!

At first, we rode the roller coaster. There was a dragon face on it, it was great. My brother and I were excited of it. Then, we sat on it and it started to move. The roller coaster went up and down! It was really fast.

Next, we played the "Splash Battle". We needed to wear our raincoats because we would play the water fight. We got on the pirate ship, it did not move fast at the beginning. When we crossed a bend, it moved faster and faster! After a few seconds, there was a waterfall! When we arrived there, the ship stopped and the water splashed onto us. We became wet but we laughed at each other. After that, we played a lot of games and they were fun too.

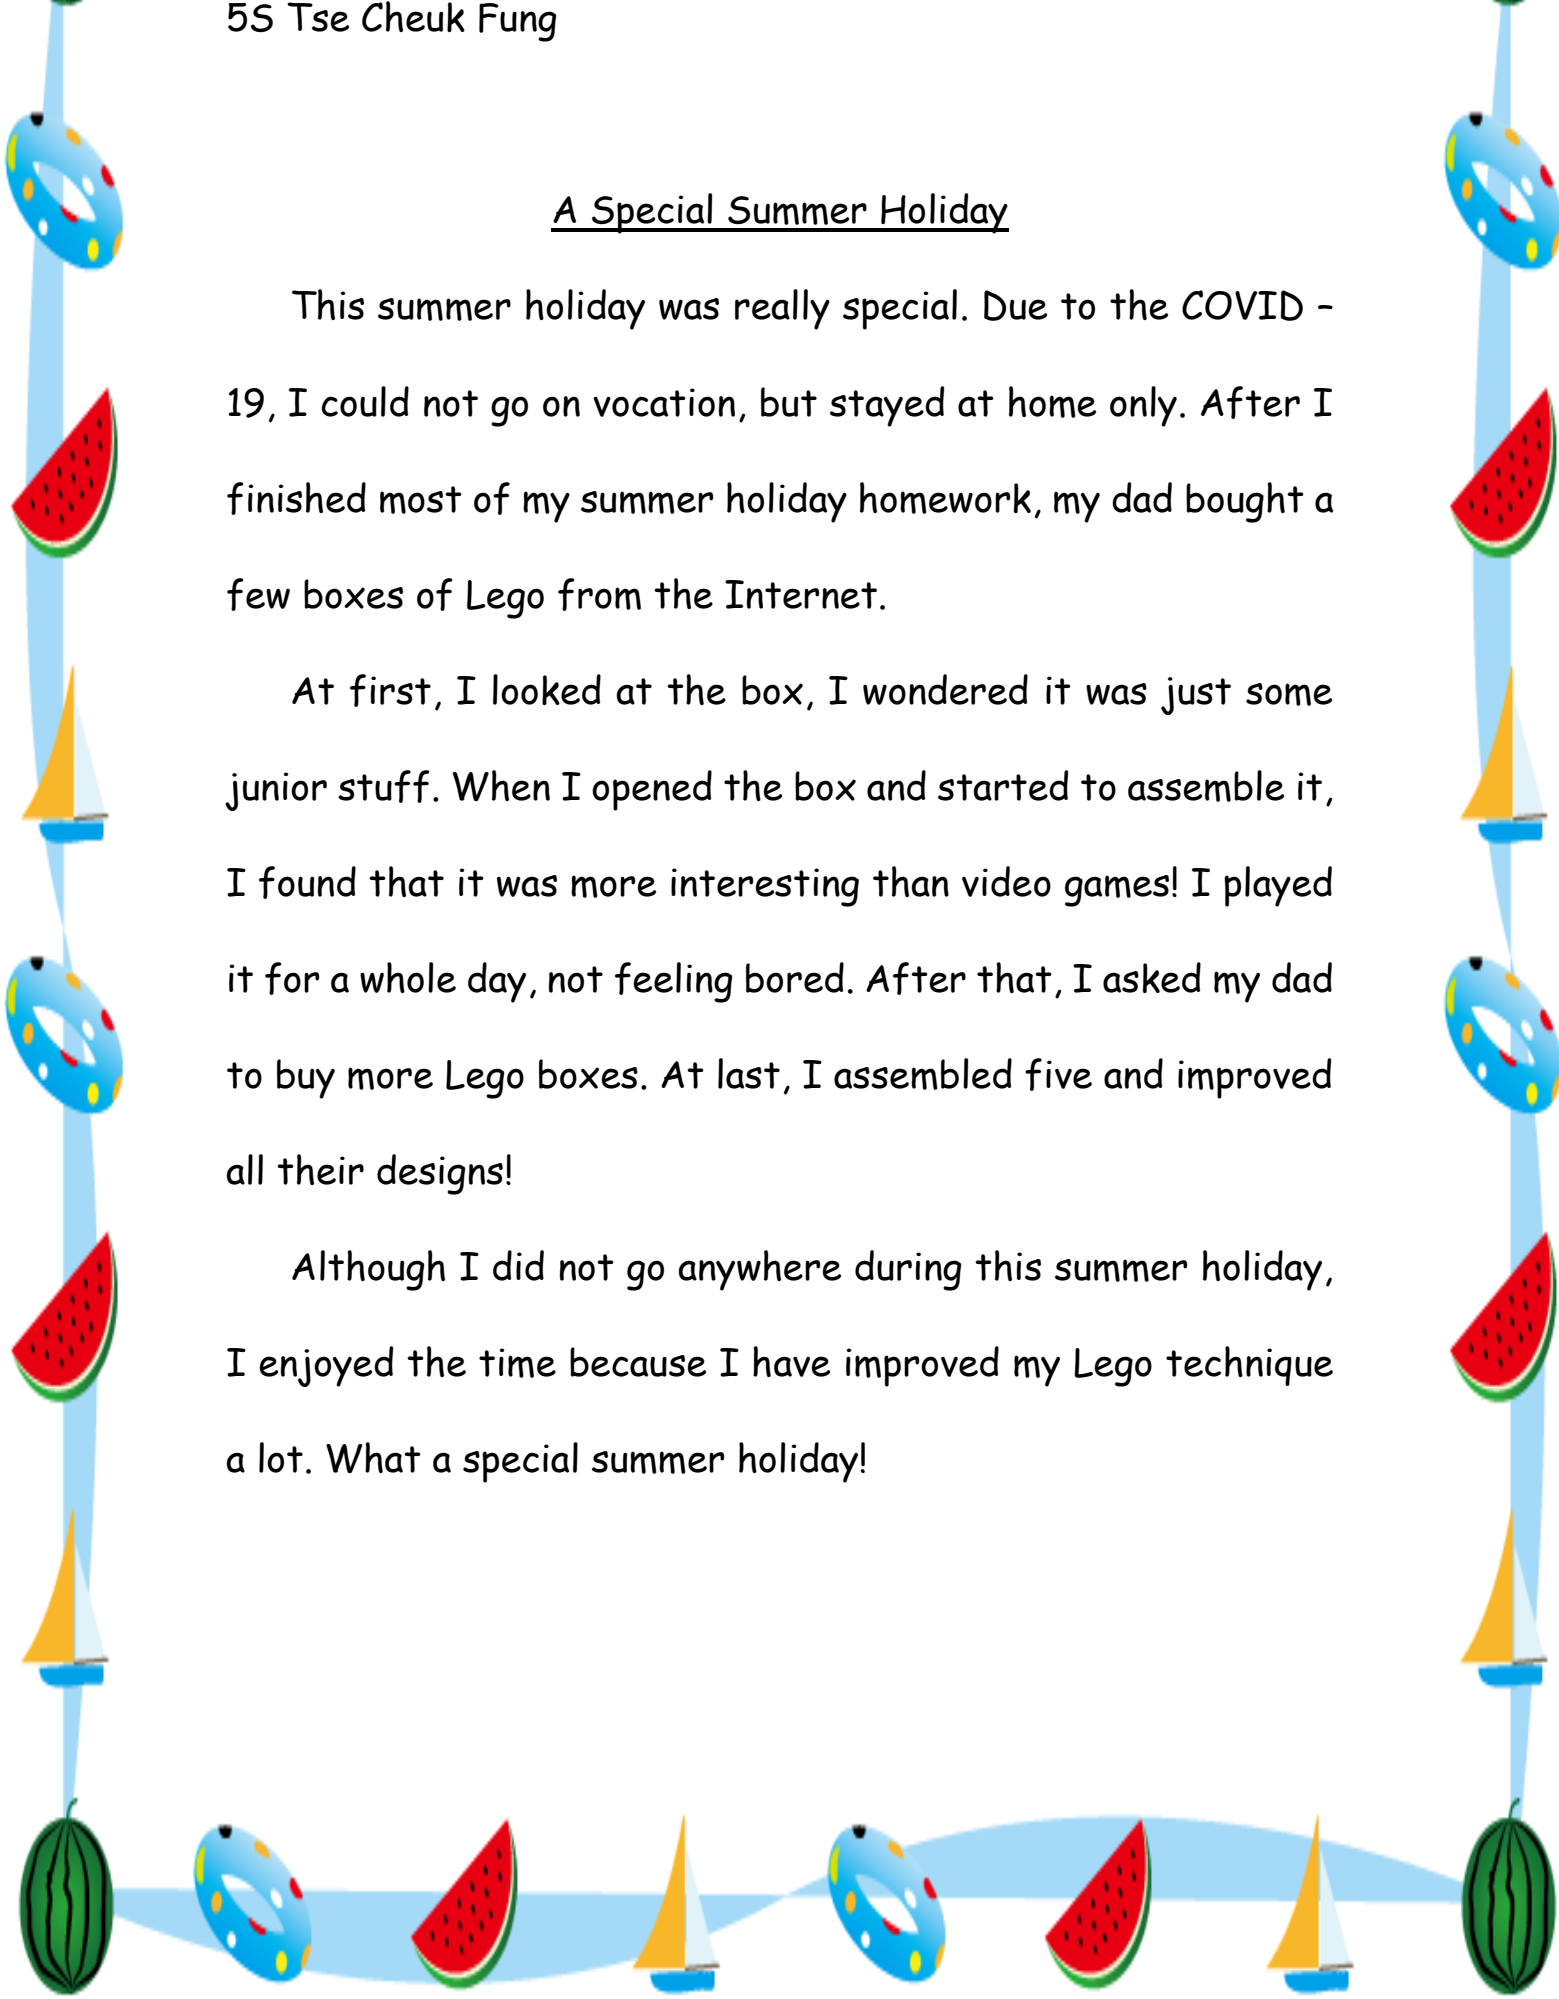

Finally, my brother and I had a car race. In the race, we drove a car around the race track once. The one who was the fastest would be the winner and won a special card. The race started, I was in the lead. However, when I crossed the first bend, my brother crashed with my car! Then, my car got slower and I was the last one to finish the race. I was a bit angry with my brother but I forgave him quickly because it was just a game.

At last, we bought some souvenirs and left. I had a great day there and I wanted to visit Legoland again.

A Special Summer Holiday

This summer holiday was really special. Due to the COVID - 19, I could not go on vacation, but stayed at home only. After I finished most of my summer holiday homework, my dad bought a few boxes of Lego from the Internet.

At first, I looked at the box, I wondered it was just some junior stuff. When I opened the box and started to assemble it, I found that it was more interesting than video games! I played it for a whole day, not feeling bored. After that, I asked my dad to buy more Lego boxes. At last, I assembled five and improved all their designs!

Although I did not go anywhere during this summer holiday, I enjoyed the time because I have improved my Lego technique a lot. What a special summer holiday!

Special moments in my summer holiday

I had a very special moments in my summer holiday last week.

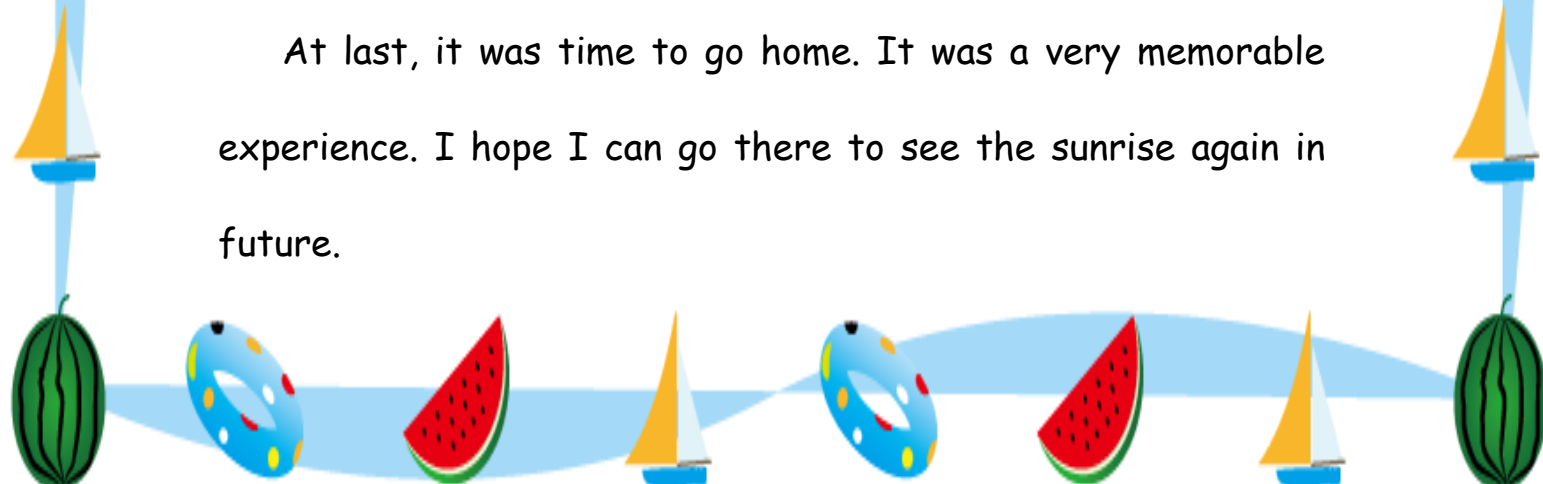

Last week, my dad said to me, "We are going to see the sunrise tomorrow." The next day, my family woke up at four o'clock. First we packed some food and took the camp pack out. Next we brushed our teeth and washed our faces. Then, we were ready to go out.

When we arrived there, my mum pointed to the dark sky and said, "Look! There are many stars!" I looked at the sky, the sky were fascinating. I can see two planets Mars and Venus clearly. After looking at the stars, we started to set our camp and cooked our food. After that, we sat down and enjoyed our food.

Suddenly, I saw the red and big sun rising up slowly. The sunrise was very beautiful. We looked at it instantly.

At last, it was time to go home. It was a very memorable experience. I hope I can go there to see the sunrise again in future.
