A special Christmas

Last year, I had a joyful Christmas. We went to the church mass. I also had Christmas dinner with my family in a restaurant. This year, we had a very quiet Christmas. We did not go to the church mass or eat dinner in a restaurant because of the gathering restrictions. Instead, we did something different.

On Christmas Day this year, I went hiking on a mountain behind Luk Hing Too Primary School. We went shopping in Tsim Sha Tsui on Boxing Day. In the K-11 MUSEA mall, we saw Hong Kong's only Legoland. Although the games were not opened, there were models of the HSBC Building and the Bank of China Tower on display. We bought an Italian style Christmas cake with some wine soaked raisins on its top. It weighted 1kg and took us three days to finish eating it. Also, it was a wonderful surprise that I got an iPad as my Christmas present. To make this holiday meaningful, I want to develop a new hobby. Because of the gathering restrictions, we cannot play any outdoor sports, so my father bought me a shuttlecock. I found that kicking the shuttlecock is not as easy as it looks. It is very difficult to kick the shuttlecock in the same direction every time.

In midst of the pandemic, I have three Christmas wishes. My first wish is that the vaccines will come quickly and stop the pandemic. My second wish is to move to a flat in the vicinity of my grandmother's house on Hong Kong Island so my mother can visit her more frequently. My third wish is that I can spare more time to help my parents with the chores. Through this pandemic, I learnt that we should be thankful that we have a peaceful life and a harmonious family.

A special Christmas

Christmas is my favourite festival. I enjoy having party with friends and schoolmates. We like exchanging gifts, playing who is the leader, Musical Chair, Simon says... etc. Also, I enjoy having Christmas dinner with my parents. However, it is different this year.

Under Covid-19, we can't have any gathering. So, some schoolmates invited us to join a Zoom party some funny games, such as Draw something, we played of Miller's Hollow. Later, the host quitted and the party ended. Although the time was short, we still had much fun. Besides, I emailed some Christmas cards to my cousins and had a Zoom meeting with them, too. Other than party, my parents and I decorated our home. It looked totally beautiful and made me feel so warm. At night, we wear Christmas costume and sang Christmas carols. Then, we had a Christmas dinner. It is a memorable day.

If the God can hear our voice, I hope my three wishes can come true. Frist, we can have face to face gathering. Second, the epidemic ends quickly. At last, we can go travelling.

A special Christmas

Christmas is a festival which everyone likes, especially children. At Christmas, I usually have sumptuous Christmas dinner with my family and relatives. Sometimes, we also go travelling. For example, last Christmas we went to Japan. We played snow and had a fabulous time there,

However, I couldn't go anywhere or have parties with my friends this Christmas because of Covid-19. I can't celebrate this wonderful festival with my friends, classmates or teachers.

Under Covid-19, my family plan to make some gingerbread man and a roast chicken. I am sure that we will enjoy them! Christmas tree and some colourful ribbons. Besides, I will have a zoom party with my classmates on Christmas day. We will play interesting games and chat with each other, I am looking forward to joining it.

Although I can't go travelling or meeting my friends and relatives face to face, I care more for my family with my family and friends.

At last, I would like to tell you my three Christmas wishes. First, I hope my family will be healthy. Second, I hope the Graduation Ceremony will be held as scheduled. Finally, I hope that Covid-19 will be gone soon.

A special Christmas

Because of this year's COVID-19 virus, we cannot travel to other countries or go to theme parks with friends. So this year's Christmas holiday, most of the time I stayed at home.

Like the days that we start online learning, I use most of the time to study for my exam and do my holiday homework. I also wake up at 8:30 a.m., to prevent me forgetting what things we do in real-life learning. But it is really a hard mission because if we have some problems in learning, we cannot ask our teachers. We can only learn by ourselves or ask for parent's help. That's why I always feel helpless when I'm having online learning.

But we can't study if we don't have energy! So I ate a lot of food and started my height treatment. I think I am 140 cm tall right now! Also, my sister and I often play video games together, like 'Among us', 'Luigi's mansion 3', 'Animal crossing: Now horizon'... Now, my sister and my relationship has increased a lot.

Although we cannot go out with our friends, we had a zoom Christmas party on 21st December, 2020. We played a lot of fun games, but we all think that it is more exciting to play face-to-face. But we sometime meet together to eat lunch under COVID-19, when we go out to eat lunch every time, we will laugh so much, like we haven't met for ten years!

Even though 2020 is a bad year, it somehow helps us improve our relationships with family and friends. I also learnt to endure because I was very impatience when I wanted something so hard, but now if I want to go to Korea, I still can't go there because of the virus. So I have to wait patiently to go to Korea. I really hope this virus will go away as fast as possible!

A Special Christmas

Every Christmas is a chance for our family to go travelling in other counties in the past years. However, the corona pandemic forced us to stay in Hong Kong this Christmas, but I had a really cool holiday which was unforgettable.

I went on wild camping in Kam Tin with my entire family at beginning of this holiday. The weather of the whole trip was freezing cold, so it made more experienced campus like us really missed up.

After we arrived at the campsite, it took as four hours to put up all the tents because my mother forgot to bring the instruction books. The most challenging task was to inflate the matters as it was huge. But after all the hard work, the matters was not comfortable at all so are all thought that it was a total waste of energy.

At night, we had a barbecue dinner and cooked a T-steak which was as big as my head. I enjoyed staying near the fire while drinking hot coca because that made me warm.

At night, I slept alone in a tent but it was freaking cold, so I couldn't sleep the entire night. The wind was so strong that made we feel like was on a ship in a storm.

After, the camping trip, I'm looking forward to join our class's Christmas zoom meeting as the Christmas Parties organized originally was cancelled due to corona. I know there would be a lot of fun games in that zoom party so it would be kind of fun and interesting.

I love to decorate my home into Christmas themed because there aren't a lot of Christmas decos in the malls this year. It'll be really cool to have a small gathering with just a few friends... Christmas Eve to conclude year 2020 forgetter. It will be a meaningful thing to do.

My wishes for Christmas:

1. Granting everyone for a healthy body because health is way more important than anything else.
2. Be concentrated. I can't just wish to have good scores in the exam because I know I need to work hard and most importantly listen to what the teachers say in the lesson in order to score good.
3. To have a righteous mind. This is really important because a lot of injustice things are occurring in here and we cannot let this happen forever. However, a lot of people still believing in those injustice events which is a shame.

I hope I will have a better year of 2021 and my wish will come true. At last, let us wish everyone as merry Christmas.
