My Parents' 12th Wedding Anniversary

Last Sunday was my parents' 12th Wedding Anniversary, so we went to a French restaurant in Happy Valley to celebrate. I was so glad.

When I entered the French restaurant, I noticed that this restaurant is called Amigo. It was quite a special name. It was so quiet inside, so I spoke softly and I felt very nervous.

After we have ordered our food, the waiter served us with an appetizer. It was a foie gras. It was so delicious. I was surprised because the waiter gave me a grapefruit sorbet to clean my mouth. At that moment, more and more customers came in the restaurant, making the atmosphere livelier. Then the waiter gave us the main course. The main course was a steak. It was so juicy!

Last, I bought the most famous cake in this restaurant for my parents. It was a Napoleon cake. They were so joyful and they appreciated my thoughts. I was so satisfied because they were happy. After we have finished the cake, we went back home. It was such an unforgettable and enjoyable day!

How I met my relatives under Covid-19

Today, I met my relatives. Because of Covid-19, we had to stay home during Chinese New Year holiday. This was my experience of meeting my relatives in Chinese New Year under Covid-19.

It was the first day of Chinese New Year today. In the morning, my dad and I were told to wear fancy clothes. I thought we were going to go out to meet our relatives, so I packed my bag. My action was seen by my dad. He said, 'Hey, we're going to meet our relatives on Zoom only.' I was shocked! We were going to meet on Zoom!

I unpacked my bag unhappily. I want to go out! Just then, I saw my grandparents' faces on the computer screen. Since I didn't agree on meeting my relatives in this way, I went away. But when I heard my cousin calling me, I changed my mind and came back. I tried to cover my unhappiness and played with them. Eventually, we still had a lot of fun. We played by turning off the cameras as fast as we could or even ran across the corridor at home. It was fun!

Although I could have a lot of fun on playing these games, I still think that it wasn't a good way to meet each other for it lacked interaction. But still, it is the best and safest way to meet under Covid-19 pandemic.

The Filmmaker

Today, my best friend and I made a movie together. Although it is not a professional movie, it is still awesome!

First, we painted the characters and background. We used a lot of colours to paint them. They looked plenty. After that, we designed some dialogues for the characters. Their conversations were very interesting. I am so proud of myself.

Finally to the last step, also the most difficult step. In this step, we shot the movie, we used a stand to regulate the iPad. We took about 150 photos and merged them into a video by using the iPad. After half an hour, we finally finished making the movie.

After this day, I understand how hard it is to make a movie. I admire the professional filmmakers very much and I wish to become one of them in the future.

My New Family Members

Last Saturday, my father and I went to the "Goldfish Market" to buy some fish. When we were shopping for fish, we came across a reptile shop.

There were a lot of reptiles, for example, lizards, snakes, turtles and frogs. I like them all. Suddenly, I discovered two lizards that are very beautiful. One of them was yellow an orange, another one looked like a leopard. I asked the staff how to raise them. The staff told me that they called leopard gecko. It is very easy to raise them because they do not need a lot of space to love. They just need a plastic box as habitat. They eat insects, such as worms and cockroaches. Also, they need to drink water, but they eat dry food. The lifespan of them is around 15 years. They need warm pads and they have to live under a temperature of around 30°C.

At last, we decided to buy them and we were so happy to have these two new members in my family. However, I have to do the clean-up once a week. Although it is disgusting, I still enjoy it much.

The Last Month in Primary School

There's one month left and then I'll graduate from primary school. My feeling is very complicated.

I'm scared about the new subjects that I'm going to study in secondary school, such as Geography and Economics. I think they are difficult. Also most of the subjects will be taught in English. It's hard for me to adapt when the language switches from Chinese to English. My English is poor, so I'm a bit worried.

Besides, I feel reluctant to my friends because we are going to promote to different secondary schools. Since everyone has lots of things to do, we may not have chances to meet each other anymore. However, I can get to know more new friends in the secondary school and this makes me feel excited.

At last, I want to say thank you to all the teachers and friends who taught and accompanied me. In the past six years, I've learnt a lot of knowledge and experienced a lot. These six years was really fun!
