### **Zoom Lessons before Chinese New Year**

We had half day lessons at school for almost the whole first term in P.5, but now we have zoom lessons. It started on 14<sup>th</sup> January, 2022 and we have going an learning in zoom lessons for nearly 2 week.

You may ask why we need to have zoom lessons? As the Covid-19 pandemic is still ongoing, the virus has been changed to 'Omicron' and it leads to be epidemic globally. A lot of people were infected easily. One month ago, there were a few 'Omicron' cases appearing in local Hong Kong society. More people were infected in Hong Kong later, so EDB announced that all primary students need to have online lesson at home.

In fact, we have zoom lesson, every day during these few weeks and it's quite busy in the morning, but I think it is boring and horrible. First of all, we can't chat without friends in the recess time. Second, we learn less than usual because our zoom lessons are shorter in time. Third, the connection of the internet is sometimes not good and smooth enough and some lags appear. We can't have to learn to cope with it.

All our students think that learning at school is much better than learning via zoom lessons, so we hope that we can have lessons at school as soon as possible after Chinese New Year.

We all can meet each other, chat with each other and we can learn better by involving in face-to-face learning activities. It's fun and more interesting.

### **Zoom Lessons before CNY**

We all know that because of a virus called Omicron caused us to take zoom lessons at home. Now I will talk about how I feel about them and more.

About zoom lesson, I noticed that in Chinese lessons, we can't joke anymore. Luckily in listening we can concentrate better when listening to the recording.

I do like zoom lessons but I would like to go to school. The reason why is because I can talk and chat with my friends.

But Chinese New Year is coming. So I will also talk about what I'll do Chinese New Year. I plan to relax and go to visit my grandma.

So will you enjoy zoom lessons if you were in the same situation? I am sure I will! I hope you will. We should always remember that intelligence is the key to everything and so we should learn as much as we can.

### **Zoom Lessons before CNY**

We started to have the Zoom lessons from 14<sup>th</sup> January, 2022 till the Chinese New Year holiday because of the recent outbreak of COVID-19.

I think the Zoom lessons are more efficient than lessons at school, as the Zoom lessons are less noisier than face-to-face lessons. Our teachers can mute students, so even if some students make noise other students won't hear them.

But on the other hand, the zoom lesson have some disadvantages.

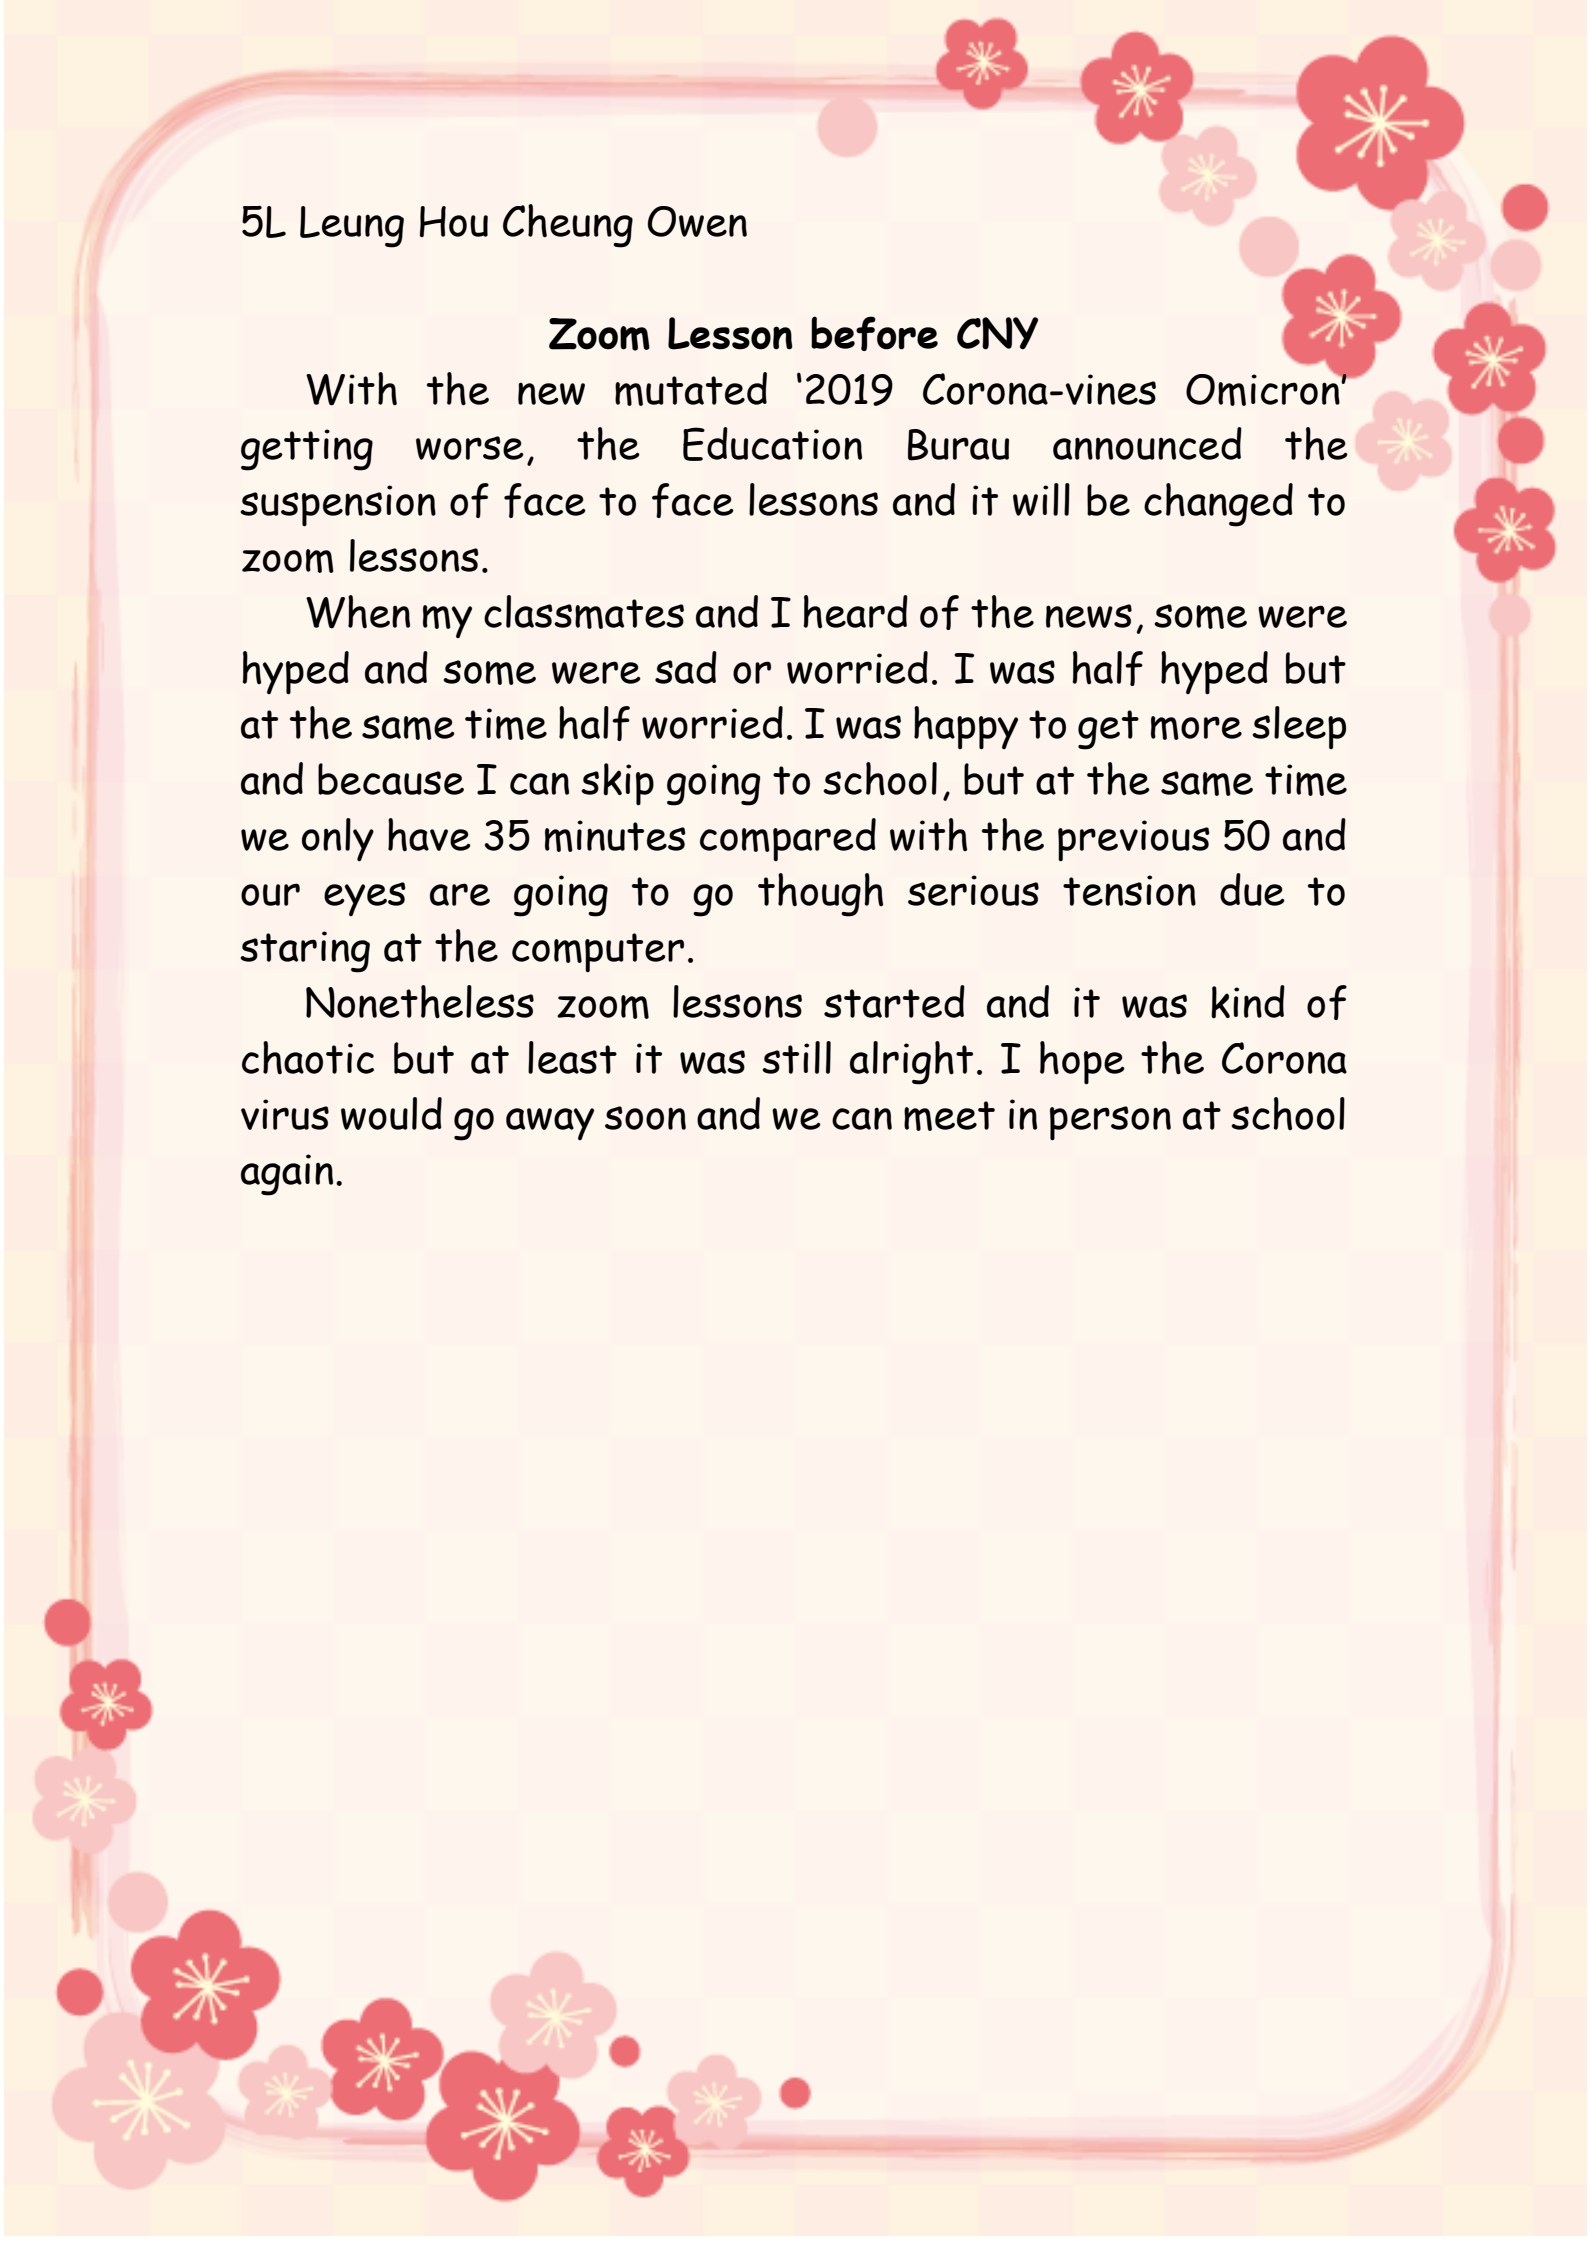

First, because we can't go back to school, some activities, like the Sports Day and the Chinese Culture Day, cannot be hold during the Zoom lessons.

In addition, as we use iPad or computer to take Zoom lessons, too much screen time is harmful for our health and eyes. But we can look outside from the window to prevent myopia.

Furthermore, it may be difficult for some students to maintain focused throughout the Zoom lessons.

Sometimes they may be distracted by other things at home. If they don't pay attention, their exam results will not be satisfied.

I wish the Zoom lessons could end quickly because I like having face-to-face lessons more.

### **Zoom Lesson before CNY**

With the new mutated '2019 Corona-virus Omicron' getting worse, the Education Bureau announced the suspension of face to face lessons and it will be changed to zoom lessons.

When my classmates and I heard of the news, some were hyped and some were sad or worried. I was half hyped but at the same time half worried. I was happy to get more sleep and because I can skip going to school, but at the same time we only have 35 minutes compared with the previous 50 and our eyes are going to go through serious tension due to staring at the computer.

Nonetheless zoom lessons started and it was kind of chaotic but at least it was still alright. I hope the Corona virus would go away soon and we can meet in person at school again.

### **Zoom Lessons before CNY**

Due to the COVID 19 became severe again, my school want to protect student safely, so decided to have lesson by zoom. I started the zoom lessons on 14<sup>th</sup> January, 2022.

From my point of view, I thought zoom lessons had benefit is that we don't need to wake up early and it can be more comfortably. On the other hand, the harm is that the time for the lesson become shorter. It means we learn the thing become less which is not enough. Besides, we cannot that with classmates and teachers. I felt sad when I know the news.

I hope after the Chinese New Year the COVID 19 can disappear so we can go to school in full day and people don't need to wear the mask.
