**Which is better? Face to face lessons or online lessons?**

For online lessons, students and teachers meet at school during the hours.

Students usually are more attentive as there are fewer distractions. They can easily find teachers and classmates for help, too!

For online lessons, students and teachers meet online. The time they meet is free. Students may also feel comfortable to have lessons at home. The time for travelling to school can be saved.

So which one is better?

Face to face lessons are the greatest and effective way for students to learn on normal days. Students and teachers can safely go to school without any danger.

Online lessons are suitable on special situations like extreme weather and pandemic when it is harmful to teachers and students to travel to school.

### **My new Nintendo switch game**

In February, my birthday went around and a family member of mine promised me a birthday present of my choosing. And in April, I picked a Nintendo Switch game called "Clubhouse games: 51 worldwide classics".

Back at home, I unpacked the plastic from the game and put the game cartridge into my Nintendo Switch. This game was about some board games and other sports. I played darts against a bot and it was very fun. There are games like chess, boxes, tennis, toy tanks and bowling. Out of the 51 games, darts was my favorite because there are motion controls and I had to hold my controller like a dart and do the dart throwing motion to throw the dart in the game.

But out of all, playing these games with my family was the most fun because we had fun times.

### **The day I solved the Rubik's cube**

One day, when I was scrolling through YouTube, I saw lots of videos about Rubik's cubes. I saw the world record holder solving it, his turns are faster than my eyes blinking! I immediately got fascinated with it and I started having interest with Rubik's cube from that moment.

The next day, I asked my dad if there was any Rubik's cube at home, but the answer was no. My dad then bought me a cube from a stationery shop on the same day, then I started to scramble it. However, I had no clue how to solve it.

Thinking for the solution, I didn't have any ideas, so I decided to hop into YouTube again and watch some tutorials. Yet, I still can't follow it perfectly as it is hard to figure the color orientation at first. After looking at the cube thoroughly, I finally figured out how to solve it!

Now, cube solving has become one of my hobbies. Although I know how to solve it, I still need to improve my skills and train to have less mistakes.

(My personal best: 26 sec)

### **My points of views on Reset**

I think Reset is a high-quality TV series. Do you know why I think so?

Reset is a suspense themed TV series made by Daylight Entertainment. It is adapted from a web novel of the same name. The TV series is starring Bai Jing Ting and Zhao Jin Mai. The TV series tells the story of game architect Xiao He Yun and college student Li Shi Qing who are caught in a time loop after a traffic accident with a bus explosion. The main characters try to stop the explosion, find the murderer behind it all and end the loop.

As the theme of this show is time loops, there may be some bug when the editing the video. Therefore, many TV dramas will try to avoid them so as not to wear them.

Also, there are some details about the show. In fact, the two main characters are destined to enter the cycle. When we look carefully, we can see a lot of things about recycling, such as the garbage collection signs on the bus, the Mobius ring before the TV series.

All in all, I think Reset is a high quality TV series and it's plot is wonderful.

### **My holiday plans**

In March, we have a special holiday. And I am planning what I should do. I discussed this topic with my family.

First, I need to wake up at 10 am. Then my helper will help me make the breakfast. After that, I need to study until lunch time because the exam will start after the holiday!

I can eat lunch after I study, also my helper will make it. I can play videos game after I finish my lunch and it is the most exciting time in my day! At night, my mum will help me review what I have learned.

If I follow my timetable, I am sure I can pass the exams!
