### **A One-day helper**

Yesterday was my mum's birthday. My brother and I planned to be the house helpers on our mum's birthday.

In the morning, we woke up at six and cooked the breakfast for mum. I fried the eggs and my brother made the salad. When we finished it. It was already seven!

Next, we decorated our home. When mum woke up, we said happy birthday to her and told her, "Today is your birthday. We'll be your house helpers today." Mum gladly agreed.

After mum finished the breakfast, we gave her our gifts. She was very glad and thanked us. Then, mum told us to do what helpers did. She assigned us work. There were a lot of clothes in the washing machine. So, mum let us wash the clothes. My brother and I thought that washing clothes was very easy, but it took five minutes to wash a piece of clothes by hand. It was terrible! Then, I knew that doing housework was not an easy job. It made us very tired. So we would help mum to do more housework and let her be easier.

When we finished washing clothes. Mum told me to sweep the floor and my brother wiped the floor. We were very exhausted but mum was happy. We took a rest after we finished.

I have learnt to be obedient to our mother. She always feels very exhausted by taking care of use.

**Summer, please go away!**

Every student wanted the summer to stay but I really wanted it to go away!

Firstly, my summer holiday was busy! Every Wednesday, I had basketball lessons. On Tuesdays, Thursdays and Saturdays, I had table tennis lessons for two and a half hours each day! Every Sunday, I had table tennis lesson again...thankfully just for one hour.

Secondly, the summer was so hot! I just mentioned I had tennis lessons four times a week. Getting to the training center was a long way which didn't have air-conditioning. Due to the global warming, in summer, the temperature could be thirty-four degree Celsius or even higher!

Thirdly, the coronavirus stop us from travelling to other countries! The only thing that made me happy had disappeared in the summer holiday.

I don't like summer, especially this summer!

### **The Olympics under of COVID-19**

In this summer holiday, I was very delighted that my family and I could enjoy the special 2020 Olympics which was postponed until 2021 because the COVID-19 had spread across the globe.

The Olympics was held in Tokyo, Japan. It was a really large competition and the opening ceremony was very spectacular. My family and I watched the Olympic Games on TV every night after dinner.

However, the Tokyo Olympics was different from the other Olympics as there were some restrictions during the competitions, for example, there weren't any spectators in the stadiums. Therefore, there weren't any cheering teams. The athletes could not hear the cheers as usual. Besides, every athlete had to wear a mask before and after the competitions and all people in the stadiums needed to keep distance. Also, they needed to get their medals and flowers by themselves in the prize giving ceremonies.

Among all the sports events of the Olympics, I notice swimming the most because I am a member of the school swimming team. In this Olympics, Siobhan Bernadette Haughey, the Hong Kong team swimmer, has got two historic silver medals: women 100m freestyle and women 200m freestyle. She has made her personal best and has broken the Asia record. From her experience, I have learnt that you must have hard work, dedication and determination to complete a thing you want to do.

### **An unexplainable event in the summer**

It was an extremely hot summer day which most human beings like me couldn't stand the heat of the sun during the afternoon. Something strange and unexplainable happened quietly during the evening.

First, a ton of mysterious unknown glowing objects fell from the space and built a wall around the Earth. Next, thousands of enormous spaceships appeared from the gate of the wall. They landed on the ground and gave human something high-tech and left the Earth in a second like they had never existed.

At the end, human finally realized why those mysterious guests from outer space gave us that device. It was because they had known that the Earth was going to be destroyed by the heat, so they gave us the device to decrease the temperature of the Earth.

Suddenly I woke up from my bed. It was all a dream but when I turned on the news channel. The mysterious glowing objects really appeared, but they left after a while. We still couldn't explain why they visit us.

### **I did my summer homework in the last minute**

Yesterday, it was 31 August, the last day of summer holiday.

I woke up early and packed up my hat, swimming goggles, water bottle..., I was going to the beach with my friend, Yoyo. I wanted to have an unforgettable ending for my summer holiday. However, some unexpected things happened.

We arrived at the beach at 11 am by bus. It was sunny, so Yoyo and I wore our swimming suits quickly and jumped into the sea. Splash! The sea water was cool! In the afternoon, we played water fight. Our mother looked at us and smiled. We left at 5:00 pm. When we were back to Metro City, we had dinner in a Chinese restaurant. The food was yummy and we enjoyed the meal.

At 8:00 pm, my mother and I went back home. I went back to my room and packed my school bag. I found that I hadn't finished my English, Math and Science summer holiday homework. When my mum heard that, she became a furious monster and cried, "I told you to finish your homework before we went to the beach! Why did you lie to me? You always make me so angry! Finish all your homework before you go to sleep!" So I did the homework as fast as I could. Although I did it very quickly, it was 1:00am when I completed all the homework. I was really tired and fell asleep right away.

Ring, ring...my alarm rang at 7:00 am, however, I didn't wake up until 7:40am. I wore my school uniform quickly and ran to school as fast as a rocket because I was going to be late. I didn't notice that it was red light and a car hit me! A kind pedestrian called 999 and I was sent to hospital. My leg was broken. I learnt that we should check our work carefully and don't panic when we are in a hurry or in danger.
