My 'Special' Christmas

This year, I had a great Christmas time with my family. To celebrate this traditional festival, we went to W Hotel to have a buffet dinner. I was delighted and looked forward to it.

When we arrived there, I was amazed by the beautiful Christmas tree with shiny light decorations. We went inside the hotel, there was a wide variety of cuisine from different countries, like sushi, delicious Pad Thai, tasty mango sticky rice and mouth-watering grilled steak. I immediately picked up a dish and filled it with my favourite food. I was satisfied as I could eat whatever I chose. Suddenly, a loud noise caught my attention. A selfish guest was charged with extra fee by the restaurant because he didn't finish all his food. I looked at his plate and there was a lot of food left. I was shocked by what he did.

I have learnt that we should treasure our food and consider our ability to finish the food. It is because many poor people are suffering in hunger, we should not be greedy.

The first time I cook

Today, I had a cooking lesson. I was very excited. When I stepped inside the kitchen, I saw a lot of machines that help cooking, such as ovens. I was so glad that I could see something that I have never seen.

First, the teachers told me to pick up some ingredients, but they didn't tell me what food we were going to make. The ingredients were dough, sausages, cheese, olive, black truffle sauce and tomatoes. Besides, I needed to pick a food that I want. I chose bacon, because it is one of my favourite food.

Then, it was time to cook. First, we needed to make the dough's shape into circles. Second, all the ingredients were added. Third, I added some spice to make the food tasty. Finally, I put it in the oven. I know what the food was. It was pizza!

Finally, I brought the pizza home. Today, I have learnt how to cook a pizza. Also I have a great experience about cooking, I think it is fun. Therefore, I want to cook more in the future.

The Epidemic-Covid-19

Covid-19 began to spread around the world two years ago, and it has affected people's daily life.

The epidemic has made the students not being able to attend school last year, and they needed to attend classes through zoom using computers. Now, the students don't need to use the computer to go to class. They go back to school, but they can only go back to school for half a day.

The people also need to wear masks every day.

The epidemic has affected the economy of some companies, and people's wages have been lowered. Some people need to find a part-time job to earn extra money.

The epidemic has made many people sick and some have even died.

At last, I have learnt that masks are important. When we are sick, it can prevent bacteria from infecting other people.

A meaningful day in my life

Last Saturday, I experienced one of the most meaningful day in my life. On that day, I learnt a lot about stem cells and met a lot of like-minded friends.

In the morning, I arrived at Law's Foundation College. Miss Lam gathered all of us at the waiting area. There, I saw my best friend, Maddox, and we were in the same course. Such a lucky day!

A few minutes later, Miss Lau brought us to the stem cell laboratory which is located on the fifth floor. First, she taught us the basic structure of a cell. Then, she let us use the microscope to observe different types of cells. Finally, we learnt how to distinguish normal cells and stem cells. It was so meaningful.

After the course, we went to a restaurant and had an amazing lunch together.

A magic show in an elderly home

My friends and I went to an elderly home in Lok Fu at the weekend. We performed the magic show since this event was organized by the community centre to bring happiness to the lonely elderly.

We gathered in the centre and arrived the destination at 1 p.m. They welcomed us enthusiastically. Before the show started, I dressed up with a hat, a suit and a bowtie. I prepared a magic stick and a magic hat. I planned my magic show into two parts.

Firstly, we walked on the stage and introduced ourselves. "Hi everyone! We are handsome magicians! We will have two interesting and eye popping performances. Enjoy!" We cheered them up. To begin, I took out the magic hat. I asked them to count "1, 2, 3!" A rabbit came out from my magic hat vividly. The audience shouted, "WOW! This is surprising!" They giggled happily. After that, the next trick is to let my friend Alex disappear on the stage. I used a curtain to cover him. He walked secretly from the backstage to the audience seats. When he sat down, a bright spotlight shined on him. "I am here!" he shouted.

All of them clapped hands for our talented performances.

In the end, we gave away handmade presents. I felt satisfied because I can bring warmth to elderly. I learnt to be caring to them. This was such a meaningful activity!

An unforgettable moment in the summer

This summer holiday, I went to Disneyland with my friends and we had a wonderful summer holiday.

First, we woke up early because we were very excited. We jumped out of the bed and we took the MTR to Disneyland. When we arrived there we took a lot of photos because there was a beautiful fountain.

After we went inside the Disneyland, we saw a gorgeous castle and it was colourful too. We played many games, such as "Space Mountain" and "Grizzly Gulch". We saw a special show! It was because it is the 15th year celebration of Disneyland.

The show told us to pursue our dreams and not to give up easily.

At last, we went home. This is an unforgettable day to Disneyland because I know that I should try my best to pursue my dream.

I did my summer homework in last minute

"Oh no!" I cried. "I forgot to do my summer homework!" I dashed to my desk and took out the summer homework. First, I started doing my Chinese homework. "No way! I have a writing to do?" I talked to myself. I did the writing quickly but I didn't do it well. "Ok, it's fine. What's next?" I took out my English homework. I needed to do a reading comprehension, but a long one. One two..... there! Three pages! I don't know how I can read three pages in a minute with many hard words, maybe, I know I don't have much time for doing homework.

Then, I took out my Math homework. Hopefully, I just needed to read two books about Math. I took a chair and reached some books, I also reached some science books and history books. But I wasn't high enough to reach the history books. I brought a ladder and climbed up. The ladder wobbled when I was about to fall on the floor. I opened my eyes and found out it was a dream. I took a look at the calendar, phew! It was just the first day of the summer holiday!

Although it was just a dream, but I learnt we cannot do things in the last minute. For example, if we do the summer homework in the last minute, maybe we can't finish all the homework on time and we will be punished by our teachers and our parents.
