

5L Lee Shing Him, Boris

I have a green life because I don't waste any energy or resources. Also, my family members and I plant a lot of plants which can reduce carbon dioxide and produce fresh air.

However, not many Hong Kong citizens are living a green life. They don't recycle the waste and they use too much energy in the daily life.

To live a green life, we can follow the rules of 3RS: recycle, reuse and reduce. We can recycle the waste like used paper, plastic bottles and cans. They can be recycled to products. In addition, we can reuse the used things like used cups, paper bags and clothes. They can be used in a new way, for example we can use the used cup to make a plant pot. Most importantly, we must reduce the use of energy and resources, such as turning off the lights when no one is in the room.

It is important to live a green life. If we don't protect the environment, the Earth will be polluted and a lot of animals will be endangered.

My ideal place for school picnic

I usually have my school picnic at Po Leung Kuk Pak Tam Chung Holiday Camp. I suggest we go to Clear Water Bay Country Park next year.

We can get to Clear Water Bay Country Park by shuttle bus. We can play on a big grass area there, watch the amazing sunset, fly different kinds of kites and look at beautiful views such as Tai Hang Tun Viewing Point. The view is fascinating.

Having a school picnic at Clear Water Bay has its own advantages and disadvantages. An advantage is that you have a very large area of grass to have various group activities. A disadvantage is that there isn't much to do if you don't bring enough equipment. If we have a school picnic there, I can take a lot of beautiful photos with my friends and post them on social media. I hope we can have a school picnic at Clear Water Bay Country Park next year and it will be more enjoyable.

My ideal place of school picnic

I am going to have a school picnic at Po Leung Kuk Pak Tam Chung Holiday camp this year. I really like this place because there are a lot of fun facilities there. If I can choose a place for our school picnic next year, I want to go to Hong Kong Disneyland in April or May because it is spring.

We can go there by bus. It has a lot of games, such as the RC Races, Hyperspace Mountain, Slinky Dog Spin. The school picnic should last for one day and we can have our lunch and dinner in Hong Kong Disneyland with our friends and teachers.

We can play the games and take many nice photos with our best friends. We can also buy some souvenirs for our families there. But the tickets and food are very expensive.

If I can go there, I must go bananas and have a whole of time. I hope I can go there for my school picnic.

5L Wong Kin Hang Samuel

My ideal place for school picnic

We often have school picnic in Holiday Camp. But I suggest we have our school picnic in Ocean Park, because we can try something new.

We can get there by MTR or coach. We can play on the rides such as roller coaster and Ferris wheels. Also we can watch dolphin shows and take photos with the Giant Pandas. The school picnic will be around 4 - 5 hours.

The advantages are we can see different kinds of animals and the rides are fun. The disadvantage is the tickets are expensive. From the school picnic I can build up friendship with my classmates. Therefore, I hope that we will go to Ocean Park next time and the park will give us a discount.

How to live a green life

Do you have a green life? If you don't, read this passage.

Do you think Hong Kong is a green city? Well, I think it isn't a green city because there is too much household waste. The second reason is that rubbish classification isn't good.

You can live a green life by 3Rs. First, you can recycle plastic bags. Secondly, you can reuse plastic container such as plastic boxes and bottles. At last we can reduce using disposable tableware and straw.

It is important to live a green life because of global warming and wasting plastic will pollute the ocean and kill ocean marine life.

In addition, we need to save the world and protect our city, and try our best to keep our life green.
