School picnic

Do you like going to school picnic? Yes, I do.

My class teachers and classmates and I went to Pak Tam Chung Country Park.

In the morning, we went to the country park by coach. When we arrived, the weather was sunny but windy. Then we gathered as groups.

First, we played basketball. After for a while, we played archery. In the beginning, I didn't get any points. For hundred tries, I still didn't get any marks. Then my classmates told me that I should not too nervous and rush. I should aim at the target and focus on the point. Surprisingly, the arrow got in with my first try. I directly felt on cloud nine.

Afterwards, we were so hungry that we could eat a horse. So we found a meadow and we sat down and got our snack. We ate some mouthwatering snacks and candies.

Next, we rode a bicycle along the path that is beside the shore. We enjoyed some breathtaking sights and down the rocks. There were some crabs walking left and right just like dancing.

At last, we left the country park around twelve ten. I felt dog tired but happy as a clam. It is because I enjoyed our beautiful nature and I have learned how to play archery.

School picnic

Today was my favourite day. It's the school picnic day. I prepared a lot of food. I couldn't sleep at night because I felt excited about the school picnic.

On the picnic day, we all went to the campsite by coach.

First, my friends and I went to ride the bike. However, I didn't know how to ride a bike. So we did something else, such as walking around and playing in the playground. Then we took a rest and ate some snacks. At last, we went to play table tennis and badminton. We got a lot of fun. When we finished playing, we got together with my classmates and class teachers. Then we left at around twelve ten.

Today was a fun day. I had a whale of time. I can't wait to have another school picnic with my friends. Looking forward to having another one soon.

School picnic

Yesterday was school picnic. The weather was a bit cloudy. We went to Po Leung Kuk Jockey Club Pak Tam Chung Holiday Camp. Serene, Hayley and I were in a group.

We did a lot of different kinds of activities with my groupmates. First, we rode the bike. Hayley and Serene were not good at cycling, so I taught them. Next, we played at the park. There were slides, swings and see-saw.

Suddenly, I thought that we were late at recess. We run as fast as we could. Unluckily, we arrived late. Therefore, our class teachers didn't let us play for fifteen minutes. They punished us. We felt ashamed.

At last, we played the claw machine. We were lucky because we caught a teddy bear. We were excited. We jumped up and down excitedly.

After the school picnic, I learnt that doing things on time is so important. Being early is better being late. I am P.5 now. I should be more mature and thoughtful.

Smart bins

I am a member of the environmental protection club. And now, I want to introduce an advanced technology recycling item to you.

The item I am going to introduce to you is Smart Bins. Smart bin's size is like the little trash cans at home. On each of the bins, there is a little hole for you to put in the recycling material. On each of the three bins, there is a little screen about environment protection and the screen will appear a list of prizes for you to choose when you dispose recycling materials into the bins. The smart bins will be installed at every floor's corridor for students to recycle recycling materials.

Students can put paper, plastic and metal into bins. As I said you can get little prizes when you dispose recycling materials into the bins. You can get anything you like by telling the dispenser what you want and it will give it to you. The environmental protection club will organize a "Green Day" activity for the use of smart bins. I will promote the smart bins by putting posters around the school about the smart bins.

I expect that students can learn more about the environmental disaster around the world and live a "Green Day" every day to protect the environment from using smart bins.
