

1L Au Yi Lok Damon

## My Park

The name of the park is Damon theme park.

There are giraffe slide, turtle roundabout and an elephant swing.

I design the facilities because they are excited.

I can keep some flower, plants and small animals in my park.

In order to protect our environment, we will recycle the rubbish in the recycle bin. The first is for paper, the second is for metals and the third is for plastic. I wish everyone will enjoy to play in my theme park.

### Playing in the Park

Welcome to Kidland! Kidland is founded by a little girl called Clarisse. She created this theme park for children ages 5 years old to adults who are 20 years old. There are different facilities for different age groups. There is one big playground for children to play with attendants who work in the park. There are two long slides (one is straight and another one is spiral). For adults, they are play on a fast rollercoaster that they go around in five circles in less that five seconds! Clarisse design there facilities she enjoys having fun and she is also a child too!

In the nature area, visitors can see many colourful flowers. There are different kinds of fish swimming in the pond. Visitors must remember to put their rubbish in the correct recycle bins and no littering in the theme park.

## Super Duper Fun Park

The name of the park is called Super Duper Fun Park. I am going to design a theme park about animals. I will put an elephant slide at the entrance. Everyone takes an iPad to the park and win points to redeem presents. There are Easter eggs hunt path. Everyone finds chocolate eggs can earn points. If you are tired, you could sit on the red panda bench and feed red pandas. There is a nature area, I keep one hundred cats in the nature area. Because I like cats. I want everyone knows how to protect the environment. People can plant trees and flowers here. You can also buy recycle materials toys and dolls.

### What a Beautiful Park

Good morning! I am Designer Chloe. Today, I will talk about my park. It is called 'Beautiful Park'. There are so many red color roses in the park. There is a giraffe slide inside the parks. It is tall and yellow color. There is a dolphin swing. It is cute and I like dolphin very much. There is a pond next to the park. In the pond, there are many fishes. They are happy.

I love my park. We need to protect our environment. We need to keep clean everywhere. We cannot throw rubbish on the floors. If everybody can do it, then my park will be very beautiful.

### My Hobby

"The Fun Park" is a theme park designed with the characteristics of the animals. There are unique multi-storied playgrounds to interactive games and structures. At the playgrounds, you will see an "Octopus Swing Ride", "Caterpillars Roller Coaster" and "Dinosaur Slide". These facilities are fun and accessible to the kids and adults. I add the characteristics of animals throughout the Fun Park because they are cute and colourful. People can ride around adventure with animals. When people walk around the park, they will see there are many small plants near the balloon ride. I keep different kind of flowers in front of the castle, decorate as a bear. To bring out the message of protecting our environment, there are different signs to remind people, like "No Littering" and "Save Water" and there are "Panda Rubbish Bins".

### My Free Time

As a designer, I would love to create a theme park that focus on the beauty of animals. The name of my theme park is called "Native Beauty".

There will be a "Penguin Playhouse". This facility will be designed to copy the icy landscape of Antarctica, where these birds live. Visitors will be able to watch the penguins walk on snow and dive into water. There will be staff teaching visitors about global warming and what we can do to protect their habitats.

There is also a "Butterfly Garden". It fills with colourful flowers and butterfly. Visitors will be able to walk along the flowers and see them up close. Staff will tell visitors about butterflies' life cycle and behavior. Also tell it is important to preserve habitats and what we can do to protect and support.
