### **A week in Zhangzhou**

Last week was my best week ever!

On Tuesday, our exchange group took the high-speed rail to Zhangzhou. When I met my buddy and her family, I felt strange and nervous. First, I went home and had lunch. After lunch, I visited their school. Their school was very big. On Wednesday, it was a rainy day. We went to Zhang Zhou Ancient City, it was interesting. We went to 5G factory too. On 20<sup>th</sup> April, we went to Tulou. That day was a sunny day so we were very tired. On 21<sup>st</sup> April, I joined the lesson in their classroom. And then, we visited the Teng Fei gymnasium of women volleyball team. It was fantastic! On 24<sup>th</sup> April, 23, we said goodbye to our buddies happily and then it took the high-speed train G3007 back to Hong Kong.

This is such an unforgettable trip!

### **An exchange program in Zhangzhou**

On 18<sup>th</sup> April, 2023, I said goodbye to my family and friends say speed and started my exchange program in Zhangzhou with my other eleven classmates.

On the first day of the exchange program, we all crossed the safety chocks quickly and successful. Then, we rode the high-speed train to go to Zhangzhou. The principal bought first-class seats for us and the seats were extremely comfortable. After arrived the Zhangzhou station, there were some exchange program's school's teachers to welcome us, they gave us flowers too! After that we went to the school to do the welcome ceremony. At last, we went to our pair exchange program classmates' home. I slept with my pair classmate.

From the second day to the fourth day and the sixth day, the school had prepared us different activities, for example go to the school with our pair classmates to take lessons, visiting different museums about Zhangzhou etc. After doing the activities, we can do anything with our pair classmates. I usually play with the pair classmate after eating dinner. I ate different food that famous in Zhangzhou, such as Si Guo Soup, Hai Shi Hua, Fried Spicy chicken leg, spring rolls etc.

On the fifth day, we could do anything with our pair classmate. I played table tennis, watched a movie called "Du Xing Yue Qiu" and played badminton.

On the last day, we still went to the school with our classmate to take lessons. After taking lessons, we did the farewell ceremony. At last, we took the high-speed train in the "Zhangzhou station" and went back to Hong Kong. Finally, the exchange-program was ended successfully.

### **My busy week**

This week was the busiest week I have ever had! I had a lot of fun this week.

On Monday, we had the school picnic. It was exciting and adventurous! We played with the items there and ate our food. It helped us understand our classmates as we could chat with each other.

On Wednesday, we had a music performance at Tsim Sha Tsui to listen to. The main star was a huge instrument called Pipe Organ. It was amazing. This instrument had lots of keys with a corresponding pipe to every single of them. There were over eight thousand pipes in there! It could make so much sounds! It can even imitate an orchestra very well! That's impressive! But on Thursday, my mom revealed she had booked tickets to the same music performance too! I told her "But I have just watched yesterday!" However, we still went there. And I found out that time there was a choir to perform for us too!

This week was very fun and busy for me! I wish there were more of these!

### A busy week

On Monday, it was the first day of school a refreshing start of a week, I was thrilled because it was the school's picnic day. I packed my bags with lots of stuff. When I arrived at my school, we had to wait for around fifteen minutes until the bus arrived. During our road trip I saw a lot of amazing view I saw some trees with leaves dangling off its branch and some was gently falling towards the ground. I saw some fishmen at the port fishing colourful flowers everywhere. After an hour, we finally arrived at the camp centre there were lots of activities. Rock climbing, badminton, soccer and much more. Unfortunately, it started raining so we had to find shelter immediate, we went to a big hall and we played card games it was lots of fun.

On Tuesday, even if it was a school holiday. I still had a busy schedule, I first had to do the chores then I had to exercise and lastly, I had to do homework.

On Wednesday, the teacher announced that we will go to an auditorium to listen to some classical music. The auditorium was very crowded loads of people attended this session. I thought it was very interesting and I was intrigued during the session but some of my classmate thought it was boring, I even saw one of them fell asleep. In the afternoon, I had to attend two classes so I went to a restaurant near the school the food was delicious.

On Thursday, it was IT project day so I prepared a lot of staff and went to school. The first lesson, we learnt about the basic mechanics of the machine. On the second lesson we learnt about the shape and the functions of the machine. On the third lesson we started building the machine we made the machine so if some metal touches the goal of the machine. We also did some coding so that the machine can add or deduct points from the player.

On Friday, I had to record Campus TV and it was lots of fun and the teacher evenward us for good effort. And this was the only day that all classes will be attended. Some team share the data of some exams so I studied right away. And the teacher wanted me to represent the principle so I went back home and did a Power Point with my other classmates.

### The busy week

I think this week is the busy week because there are a lot of events.

I have had a picnic on Monday. I have played with my friends on that day. we played table tennis and badminton, and also some cards games! We felt very excited.

On Wednesday, I have seen a music concert. I have enjoyed the wonderful music. When it as time to leave, I reluctantly walked away. What a valuable experience!

Also, I had a project study with my classmates on Thursday. We have researched our product carefully. We felt very happy in the process.

I am as happy as a clam! It was a busy week and also a fulfilling day!
