IT Project Day

The topic of the IT Project is parachute. I used strings, paper and adhesive tapes. I made the parachute with my friends, Alvin and Cyrus. Then we threw this parachute from the height. We had a parachute competition to see which on can stay in the air with the longest time. It was really exciting and interesting.
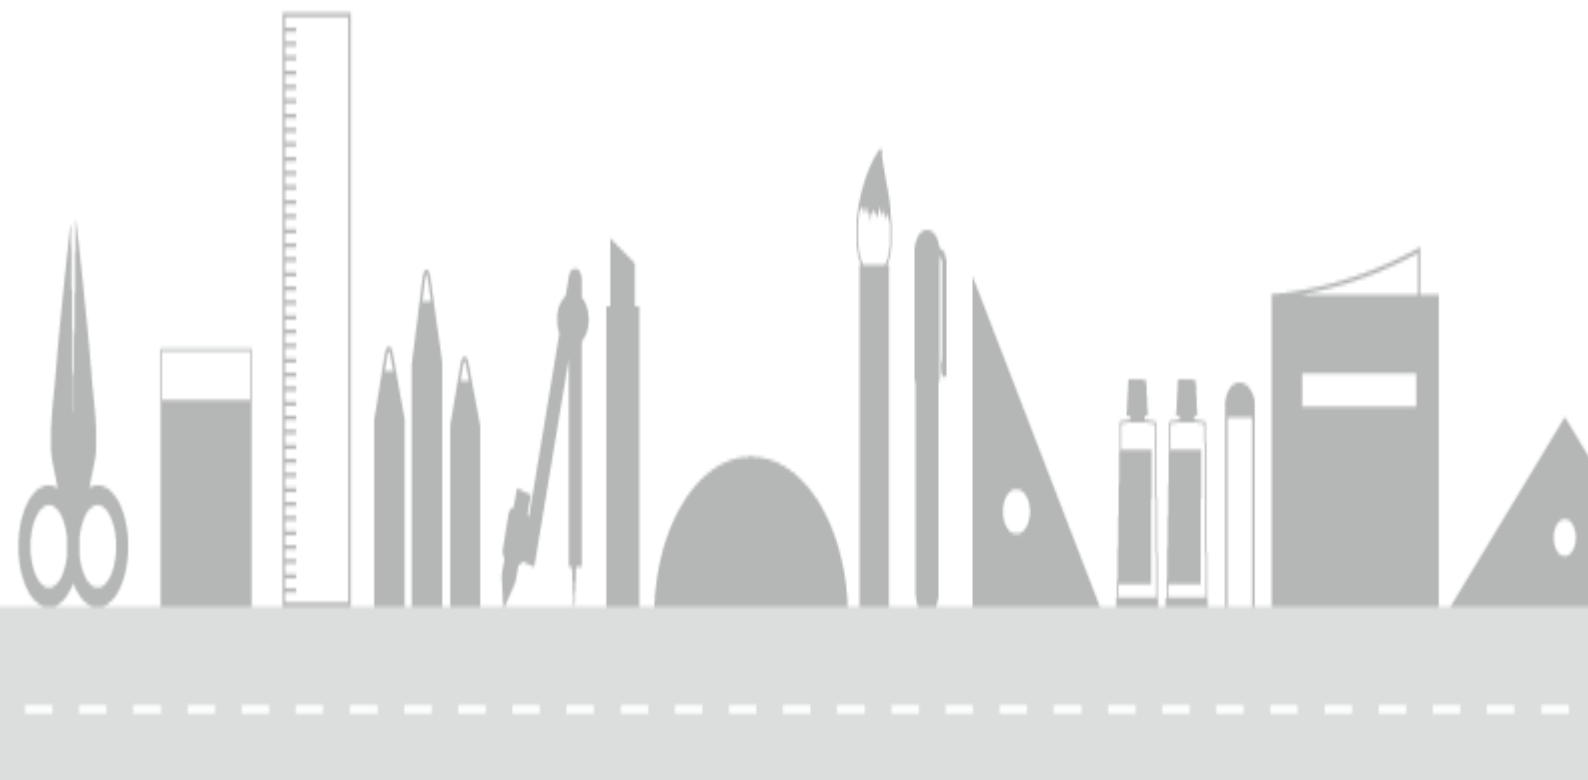

Hot Balloon

During the IT Project Day, teachers played us a video about how to use paper to make a hot balloon. I tried to follow the steps to make the hot balloon with my classmates. We have already completed half of it today.

We are confident we can finish the hot balloon in the next lesson. I feel excited to imagine the hot balloon flying in the sky.

IT Project Day

Yesterday, it was IT Project Day. Teachers teach us to make a parachute.

Teachers divide us into five groups and we start to discuss. First, we write down how to make it. Second, we talk about what to use for the parachute. At last, we share about our own ideas.

When I get back home, I try to test it. It falls quickly! I feel happy. I will make it and test it again until it falls slowly.

IT Project Day

It's the first IT Project Day today. We learn how to design Minecraft by coding. My friends and I have a lot of ideas but we finally decide to make a special farm. The farm animals are funny. The pig has a cow's body and sheep's legs. The cow looks like a bird and it can fly. We all laugh and have a wonderful day.
