### **Graduation Camp**

Our P.6 Graduation Camp was over last week. It was the most wonderful moment in my primary school years. On the 10<sup>th</sup> of April, we entered the campsite - Po Leung Kuk Jockey Club Pak Tam Chung Holiday Camp! We first went to my room with my classmates and left my backpack there. Next, we immediately did some activities. It was really fun having activities with my classmates.

The most unforgettable thing was the team games on the following day, April 11<sup>th</sup>. In the morning, I played three challenging tasks including the Water Pipe Challenge, Plank Walk, and Titanic. I loved the Water Pipe Challenge the most as it was the most difficult one. Each team had to transport a table tennis ball from the starting point to the end point using water pipes. My team discussed the solution to the game. Then, we asked a teammate to stand at the end point holding a water pipe. When the ball came near the end point, that classmate connected the pipe with the second end classmate, and the ball would successfully drop into the end point.

Fortunately, this idea worked, and we won the game. At the same night, we had a lovely time at the BBQ. It wasn't easy to barbecue the food in the correct time, but I really enjoyed the time with my classmates.

Overall, the P.6 Graduation Camp was the most exciting moment in my life. It will become an unforgettable memory that I will cherish for the rest of my life.

### **P.6 Graduation Camp**

Last week, I had my primary 6 graduation camp in Pak Tam Chung. It was really fun and exciting.

On the first day, I packed my belongings in the morning and went to school with my friends at 1:30 p.m. We arrived at school at 2:00 p.m. and took the school bus. Luckily, there was no traffic jam and we arrived easily. After we arrived at the campsite, we divided into teams and checked our rooms with roommates. Then, we started to play games. I think the most exciting was to find clues at the whole campsite and find the last code. At that night, my roommates and I were very tired but we all couldn't sleep, so we played card games for the whole night.

On the second day, we ate breakfast and started to play games which were about teamwork. Our team played very well and won most of the games. At night, we had a barbecue with our class teachers. It was fun and we ate a lot. Suddenly, we ran out of marshmallow and my class teacher asked me to buy some for the classmates. At last, I bought the marshmallow at the store and we ate them happily.

On the last day, after we ate breakfast, we had a 3-hours free time, so my roommates and I played badminton together. After that, we spent the rest of our free time in our room. We watched TV, played card games and ate some snacks. We were happy. Then, we ate our last lunch there but the taste was awful. At last, we said goodbye to the instructors at the camp and took school bus to school.

These day, I felt happy because this camp was fun and it was happy to play with my friends. I have learnt a lot from this camp, for example teamwork and taking care of ourselves.

### **P.6 Graduation Camp**

What is the most unforgettable memory in the six years in primary school to you? For me the P.6 Graduation Camp is the most unforgettable memory. We spent three days at the Po Leung Kuk Jockey Club Pak Tam Chung Holiday Camp with our classmates and teachers. We had lots of remarkable experience and made a lot of unforgettable memories.

When we arrived at the campsite, we first had a short welcoming speech from the staff. Then, we went to settle down in our room. The room we assigned to was large and comfortable, we were all fond of our room. Short afterword, we had our first activity, we needed to find the answers to the questions in our worksheet while "exploring" the campsite. Quickly all teams finished fast. After the activity we were all exhausted, so we had a bit rest in our rooms and went to have dinner. After dinner, we were supervise that we had another activity. We had to find different cards to complete the worksheet. However, the cards were very small and it was very dark that time. Luckily, we had bring some torches and by working together, we finished the fast at last we all enjoyed ourselves in today's activities but we were also warn out we quickly clean ourselves up and went to sleep.

On the second day, after having breakfast, we began the first activity. We did three different races with other teams. The coach told us the key to succeed is teamwork. Therefore, in our team we would communicate and cooperate with our teammates. At last we achieved some pleasant scores then, went to tidy up our rooms and had lunch. After lunch, we had some free time. We can enjoy the facilities in the campsite, for example, the indoor sports stadium during this period of time. Next, we had a BBQ for dinner. The food there was delicious, we enjoyed the food very much. After BBQ, we had an evening, party at the hall. Each class had to perform a performance. We had a wonderful time there. When we went back to our room, it was still early, so they played some card game before

going to bed.

Soon, it was the last day. We had our final activity after breakfast. We build a lurching machine out of bamboo sticks and ropes. Since we had lots of experience of teamwork from the last two days. We became the first team to finish, we were on could nine. Then, we had a competition of asking the machine to throw balls. However, it was too difficult that no team could get a point. After the activity it was time to pack up our things. We soon gathered at the hall and the coach announce which team got the highest points. Even though our team hadn't won, we weren't disappointed because we gained a lot these days. Then, we had our lunch and began to return to school. All of us were unwilling to go because we had a whole of time at this camp.

From this P.6 Graduation camp, I had made lot of unforgettable memories and experience. I had also learnt the importance of teamwork. Even though we are going to leave primary school soon. I hope that we can still remember the precious memories we made during primary school.

### **Graduation Camp**

In these mostly wonderful six years of education, friendship, and passion, one of the most memorable and significant parts of them is the P.6 Graduation Camp. It was held in the middle of April, at Po Leung Kuk Jockey Club Pak Tam Chung Holiday Camp. After dinner on the first day, all of us needed to do a very tough task: find all red signs for the night. It was tiring and tough but really worth it.

On the second day after breakfast, it was even tougher but not that bad. It was actually pretty fun but we needed to stay under the scorching sun for a whopping three hours. After an hour of free time and a scrumptious and delectable lunch, it was time for three hours of free time and at that time, I met a new friend. Her name is Stella, and she is from Class 6S. We talked and talk the entire time. Then, we has barbecue for dinner. When I was roasting a marshmallow for dessert, it caught on fire and was flaming. However, I wasn't dumfounded, instead, I just blew the fire and ate it like I didn't care. A little later, we had a music show from every class. The second one was elite. Every all of us were chanting, cheering and clapping. It was an exquisite time. We also had a bottle flipping show. It was exhilarating and spectacular. At the end of the shows, the teacher told us to savour these last few months of bliss.

I really liked this camp because it allows me to develop teamwork skills and friendship. It also teaches me how to make friends and team work importance. Most importantly, I want to go camping with my classmates again. Furthermore, we are possibly going to part ways after a few months, so it is pretty emotional, but also we are possibly going to stay together, so I don't have to worry about meeting and people and learning people I know.

### IT Project Days

Our class was divided into five groups for this year's IT Project Days. Each group had to create a game related to healthy lifestyles and simple machines. My group of six groupmates including Jayden, Lucas, Boris, Aiden, Nathaniel and myself, decided to make a ball-rolling game that incorporated nutrition.

First, we brainstormed game rules. We landed on the idea of having three colored balls representing different nutrient types. Players would need to catch the falling balls in a collecting box at the bottom of a sloped board, earning point based on the nutrient types. To create the sloped track, we connected three boards together. We also added challenges like toothpicks placed along the slope.

Next, we focused on designing the collecting area. However, detecting the ball colors proved extremely difficult. We needed a color sensor to tally the points. Despite acquiring a sensor, we struggled immensely with the coding. No matter what we tried, the code would not execute properly, leaving us frustrated and confused.

Just when we felt stuck, our teacher noticed us. She helped us search online tutorials until we finally found a coding solution that worked. We were ecstatic when the color detection functioned flawlessly during testing. "We did it!" I shouted excitedly to my groupmates.

The presentation date of January 30<sup>th</sup>, 2024 is fast approaching. While the programming challenges caused setbacks, working through them reinforced how failure precedes success. I'm looking forward to sharing our finished ball-rolling game and the lessons we learned along the way. The project days have been a rewarding experience. Thanks to the guidance from our teachers and the perseverance from my classmates.

### **IT Project Days**

To let our life in school gets meaningful and rich, my school organized a day called "IT project day". In Primary Six, the theme of the IT project day is "Healthy Life". The presentation day is on 20<sup>th</sup> July.

I am in group 4, Elli, Little Star, Grace, Jaslene and Merci are my teammates. I had to design a fun game with my teammates in the first term. In those days, I felt so happy and excited about our game. My progress is to make a game myself about healthy food and nutrition label. Our game is called "healthy NBA".

There were a lot of challenges during the time. For example, we made a shooter to shoot the ball, but the shooter wasn't working properly. I solved it from getting improved in every mistake we made. Finally, we finished our shooter perfectly. I felt very successful in that period.

From the IT Project Days. I've learnt that teamwork is so important. I've also learnt how to make a brand new game on my own. I am looking forward to the project day afterwards.

6L Siu Yi Wing

### **IT Project Days**

In these six years, I have gone through a lot of IT Project Days, but the most unforgettable Project Day is the P.6 Project Day.

This year, our theme was making a game by ourselves, and the presentation day is 30<sup>th</sup> January which will be the most exciting day.

I am in Group 4, there are six members in my group. They are Kobi who is the group leader, Jaslene, Little Star, Grace and Merci. We are good friends. In this Project Day, we have to make a game by using some of the science knowledge, such as pulley, inclined plane on gear wheel. In our process, we did argue and wanted to give up, but finally we didn't. We tried our best to make the most attractive game.

There are load of problems, such as not enough foam board or materials. We solved it by buying more instead of giving up.

In the P.6 Project Day, we have gone through a lot, but we figured it out together. It improved our team spirit and friendship. I enjoyed it a lot and we all went bananas, it is really unforgettable.

6L Wong Ngai Nathaniel

### **IT Project Days**

Our Presentation Day for our IT Project is on the 31<sup>st</sup> January. This year, the theme for our project is Healthy Life. Let's see what we prepared for our project in the past few months.

Our class has been divided into five different groups which I am in group five. My teammates are Gordon, Boris, Aiden, Jayden Chan and Lucas. This year, we had to make a game which is about Healthy Life. We made a game about pinball and we will teach people a lot about nutrition, so this game is called Food Nutritional Paring.

We had already finished most of the work but we had faced a lot of difficulties when we are working. First, we kept messing up the coding for our project. Still, we don't have the perfect coding for our game, but I am sure we will complete it. Second, we always measure the distance of the foam board wrong, which may make our project uneven.

Even though we have some difficulties in our project, I've still learnt a lot of things from this project. One of them is teamwork, we needed a lot of teamwork to finish the project. I hope that our project can be the best project in the class.
