### Soil and flowers

One day a little girl planted the flower seeds in soil on a small pot. The flower seeds grew day by day and soon turned into a beautiful flower.

The flower looked at her beautiful body and said to the soil, "Look, I am so beautiful, but you are dark and dirty, so ugly!" After hearing what the flower said, the soil replied displeasedly. "I was born like this. How can you say that to me?" The flower said again "The more I look at you, the uglier you become!" The insect crawling on the soil heard their words and couldn't help but said at the flower, "Don't underestimate the soil. Without it you wouldn't be so beautiful today." However, this flower didn't believe it.

At night, the soil whispered to the insect "Little bug, Little bug, since the flower don't like me anymore. Can you help me bite a hole in this flower pot?" Although the bug didn't know what he was going to do, he still said "yes" to him. After that, the insect found its friends and worked together to bite the hole. At night the soil secretly slipped out of the small hole in the pot.

A few days later, when the little girl came to see the flower, she found that the table was covered with soil and the flower had withered.

### **A Study Tour to Guangzhou**

Have you tried to sleep overnight outside without accompanying of parents? Last month, I went to *Guangzhou* for a 2 Day 1 Night study tour with my teachers and classmates. We had full of expectation and felt excited for the trip. Let me introduce some itineraries for you.

On the first day, we went to the *Guangzhou Metro Museum*. There were many model trains. It displayed lots of world's train tickets and it was so fresh for me! Then we went to *Guangzhou Sewage Purification Company Limited*. It operated a total of thirteen sewage treatment plant in the central urban area. Treated water can be used for raising fish and cultivating flowers. It is so recyclable.

On the last day, we visited *Guangdong Science Centre*. We had learnt a lot of Science knowledge. Finally, went to a farm which made good use of modern science and technology to produce crops and vegetables effectively and efficiently. There were many smelly flowers and green plants.

This school study trip absolutely became one of my unforgettable memories. What a fruitful trip!

### **A Wonderful Holiday**

Today, my family and I went to Disneyland. We went there by MTR. We were excited.

When we arrived there, we first took a photo in the Disneyland entrance. Then we started to play. We first played a roller coaster is called 'Space Mountain'. I didn't dare to play it at first, but because I was accompanied by my family, so I tried to play. We first buckled our seat belt. At first it was slow, but later was faster and faster. I was so scared at that time. I closed my eyes tried to sleep. But it didn't work. A while, the roller coaster was closed.

Then, we went to Disney buffet eat lunch. There was so many foods. Like noodles, jelly, pancake so on. My family and I liked the pancake. Because the pancake had Micky Mouse and Minnie Mouse face. We thought it was cute.

In the end, we went to watch the fireworks at night. My mum told my brother and I helped her took a lot of photos of the fireworks. It was beautiful. And we went home when we finished watched fireworks. Such as nice holiday.

### **My soulmate**

I have a lot of best friends and they all have different personalities, some a quiet, some are weird and crazy, but I want to introduce my one and only "Soulmate" - Suki.

Suki is a really interesting person. She can be silent all the time, or can be drunk even without alcohol! She has black short hair, hazel eyes and a big nose.

I became friends with her when I first went to fourth grade, I was really shy but when I heard that she knew Stranger things, which was a popular movie back then. I started a convocation with her and realised that we have so much in common. She likes drawing. Stranger things and the subject English like do as well.

I just have this feeling that she's my soulmate because whenever my mood is down, all I have to do is just talk or hang out with her, then all of a sudden, I feel better! She's defiantly my soulmate and I am sure about it.

### **My trip to Japan**

On 25<sup>th</sup> March, I went to Japan with my family. At night, I was so excited that I can't even sleep!

We went to many places, but the place that made me the most unforgettable was watching the dolphins and eating the seafood there.

That day, we woke up early and Dad drove us to a pier. The ocean was shining under the hot sun. I first, took a photo with the dolphin model. Then checked-in in the visitor center. After 30 minutes, I was wearing a safety suit and getting ready to see the dolphins.

We went on a small ship which we use to see the dolphins for. The captain drove the ship so fast that made me a little dizzy.

Suddenly, a passage screamed 'There!' A lot of dolphins were leaping out of the sea. We clapped and screamed, as the dolphins keep following us behind the ship. The view was amazing!

I loved the dolphins very much. I wish I can see these dolphins. We should protect our environment and save our planet. This is an unforgettable memory!
