

3D Chan Ching To Priscilla

My favourite TV program

I watch Doraemon at my grandmother's house every Friday. I love it very much. It is my favourite TV program.

All of the topics are different. One of my favourite episodes is about Doraemon helping Nobi Noby to win a battle between the aliens from space and Nobi Noby. I love it because it makes me laugh.

I enjoy watching it together with my cousin, because we can laugh together.

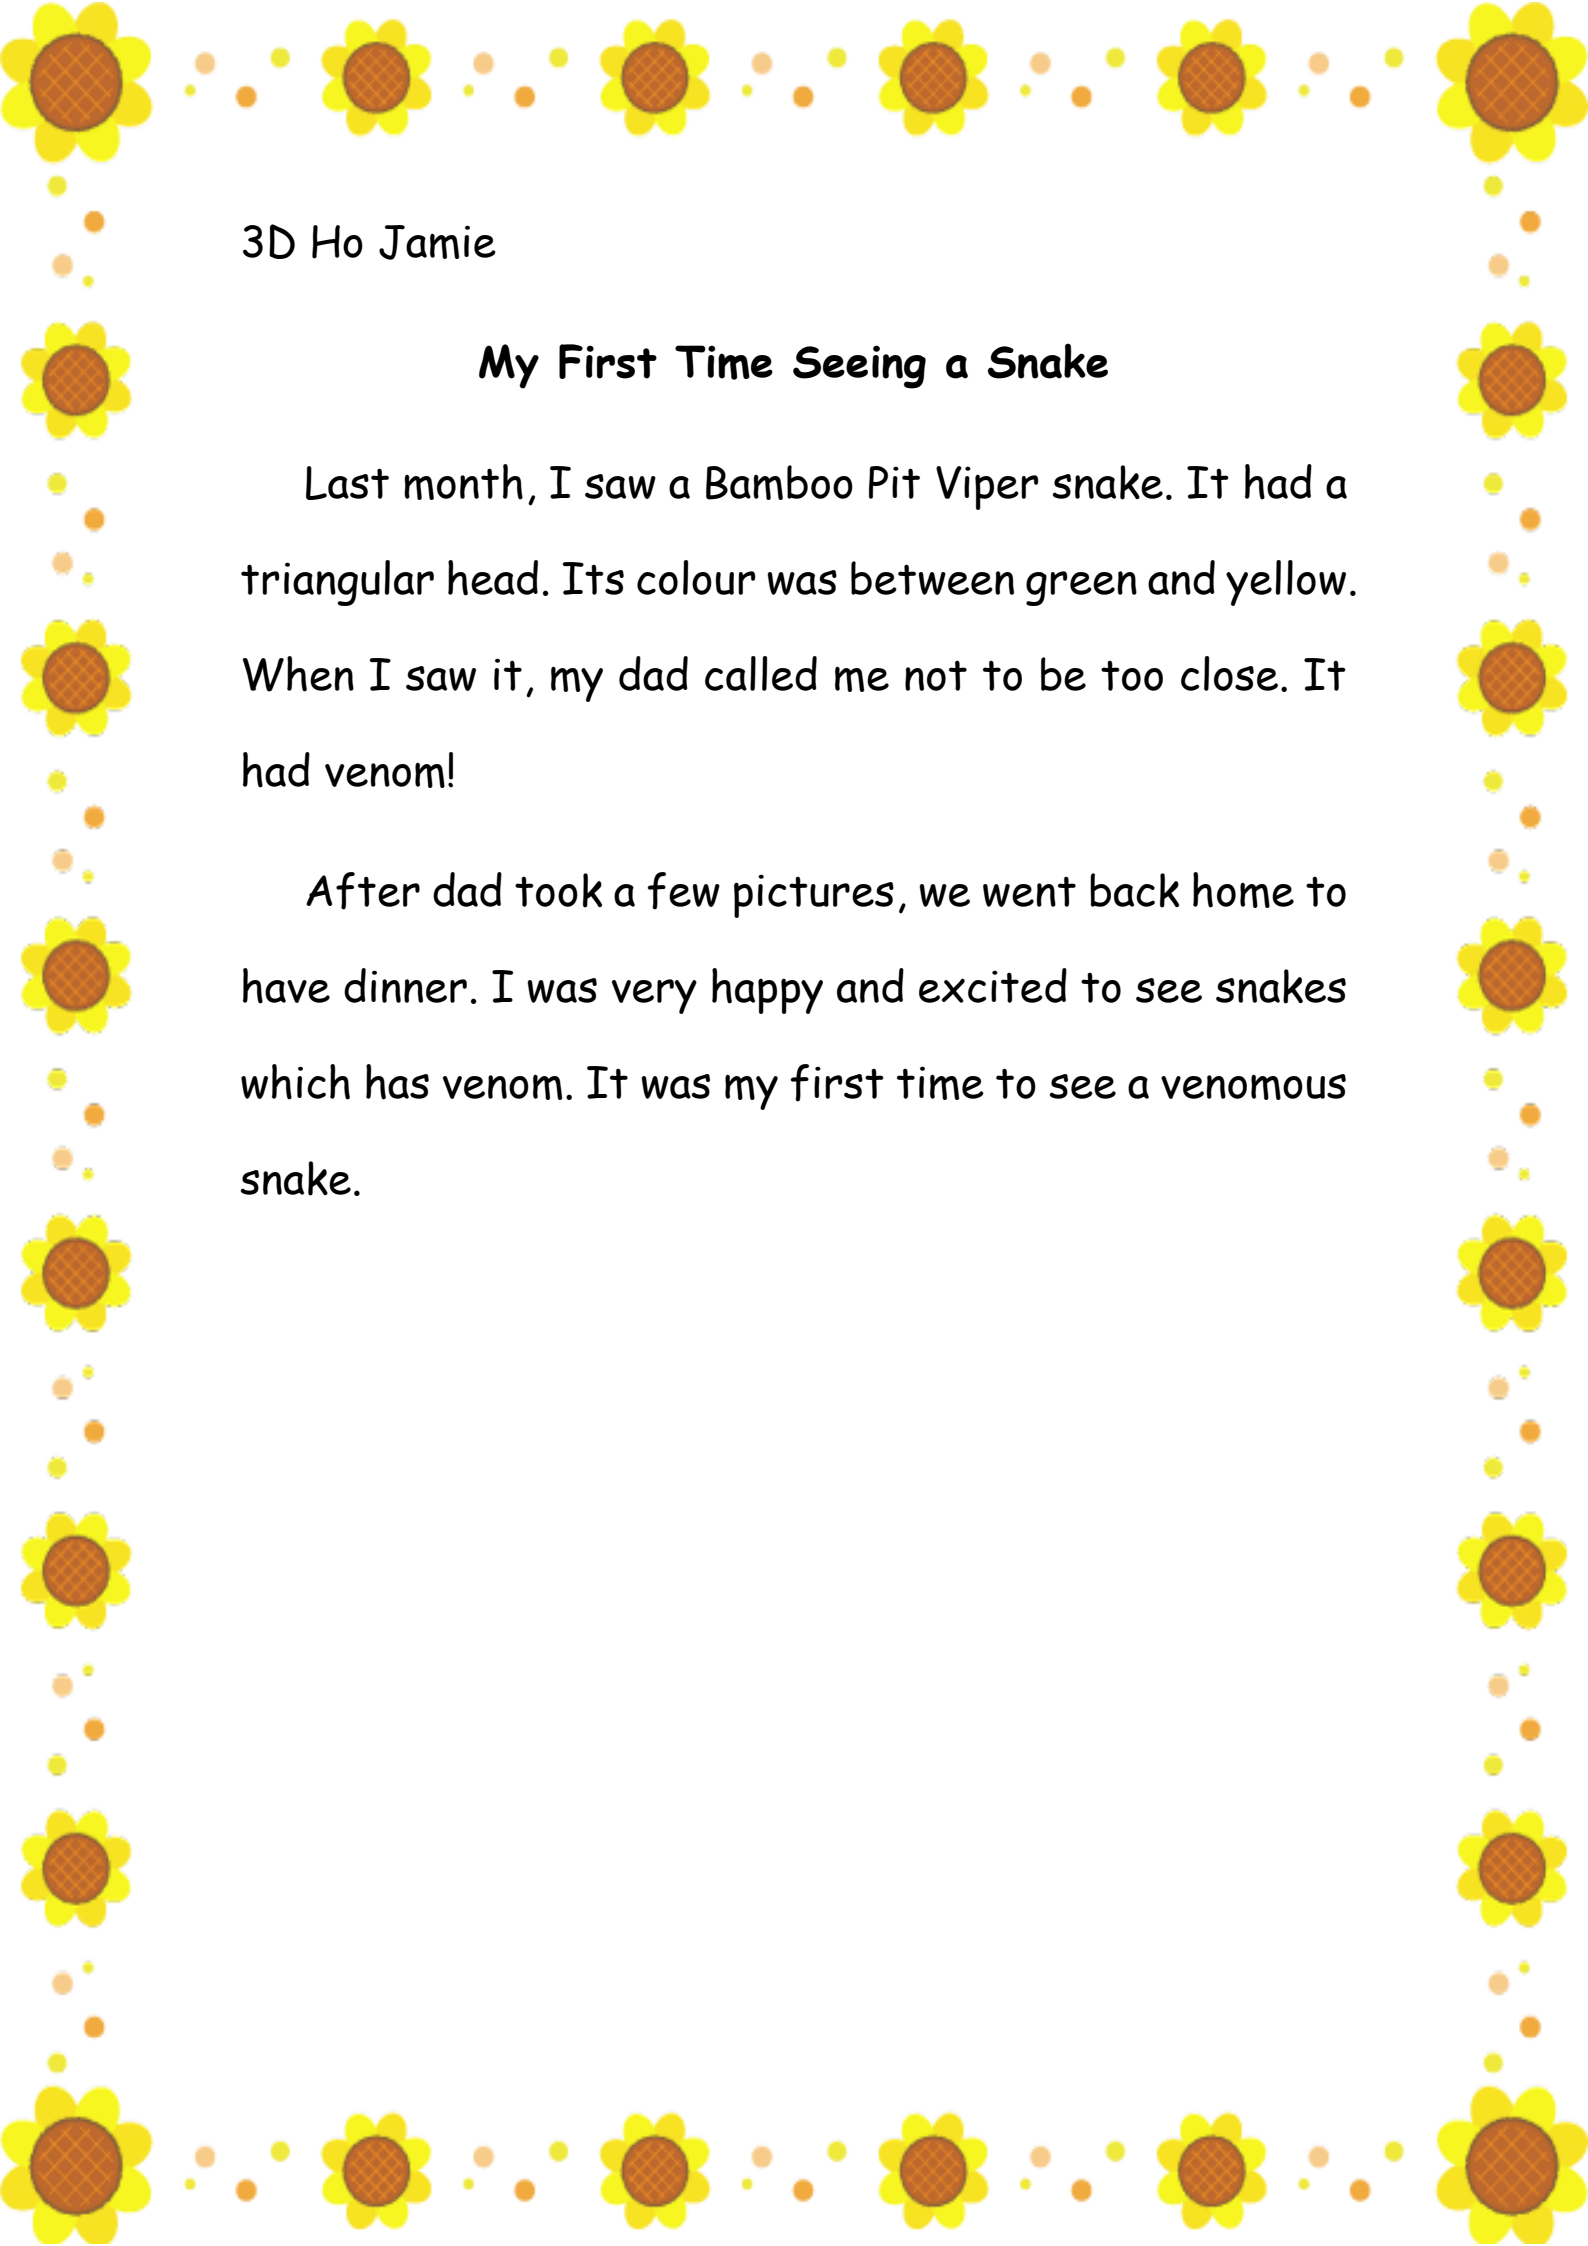

3D Cheung Hiu Nam

My favourite TV program

My favourite TV program is Maturity rating. You can find this on Disney Channel. A fifteen years old teenager from Los Angeles develops a bond with a mysterious horse while spending the summer at her mother's home island off the coast of England.

The main characters are Zoe and a horse. Why do I love it? Because I like horses and this TV show is about the process of people building trusting relationships with their horses. I usually watch this TV program twice a week. Dad, Mom and my sister watch with me. I hope this TV program to be continued.

3D Ho Jamie

My First Time Seeing a Snake

Last month, I saw a Bamboo Pit Viper snake. It had a triangular head. Its colour was between green and yellow. When I saw it, my dad called me not to be too close. It had venom!

After dad took a few pictures, we went back home to have dinner. I was very happy and excited to see snakes which has venom. It was my first time to see a venomous snake.

3D Or Pak Man

My favourite TV program

My favourite TV program is Doraemon. I watch it on Youtube.

Doraemon uses a lot of different tools to help Nobita, who is his best friend. The main characters are Doraemon and Nobita. I love it because Doraemon has a lot of amazing tools and the story is so funny.

I often watch it after school. My two little sisters always watch it together and all of us love Doraemon.

3D Yung Chun Lok

My favourite TV programme

My favourite TV programme is AumSum. It's an educational Youtube channel for kids to learn more about science.

There are different episodes. They are all science-related. There are interesting topics such as "What if we are made of chocolate?", "What if we never sleep?" and "What if all the iPhones are not working?".

I love it because I can learn a lot of fun scientific facts. I like how the boring and complicated facts are explained and brought out lively and interestingly. I will never be bored with it.

I always watch it with my family. It's fun to learn and enjoy TV time together.
