Unforgettable trip in Thailand

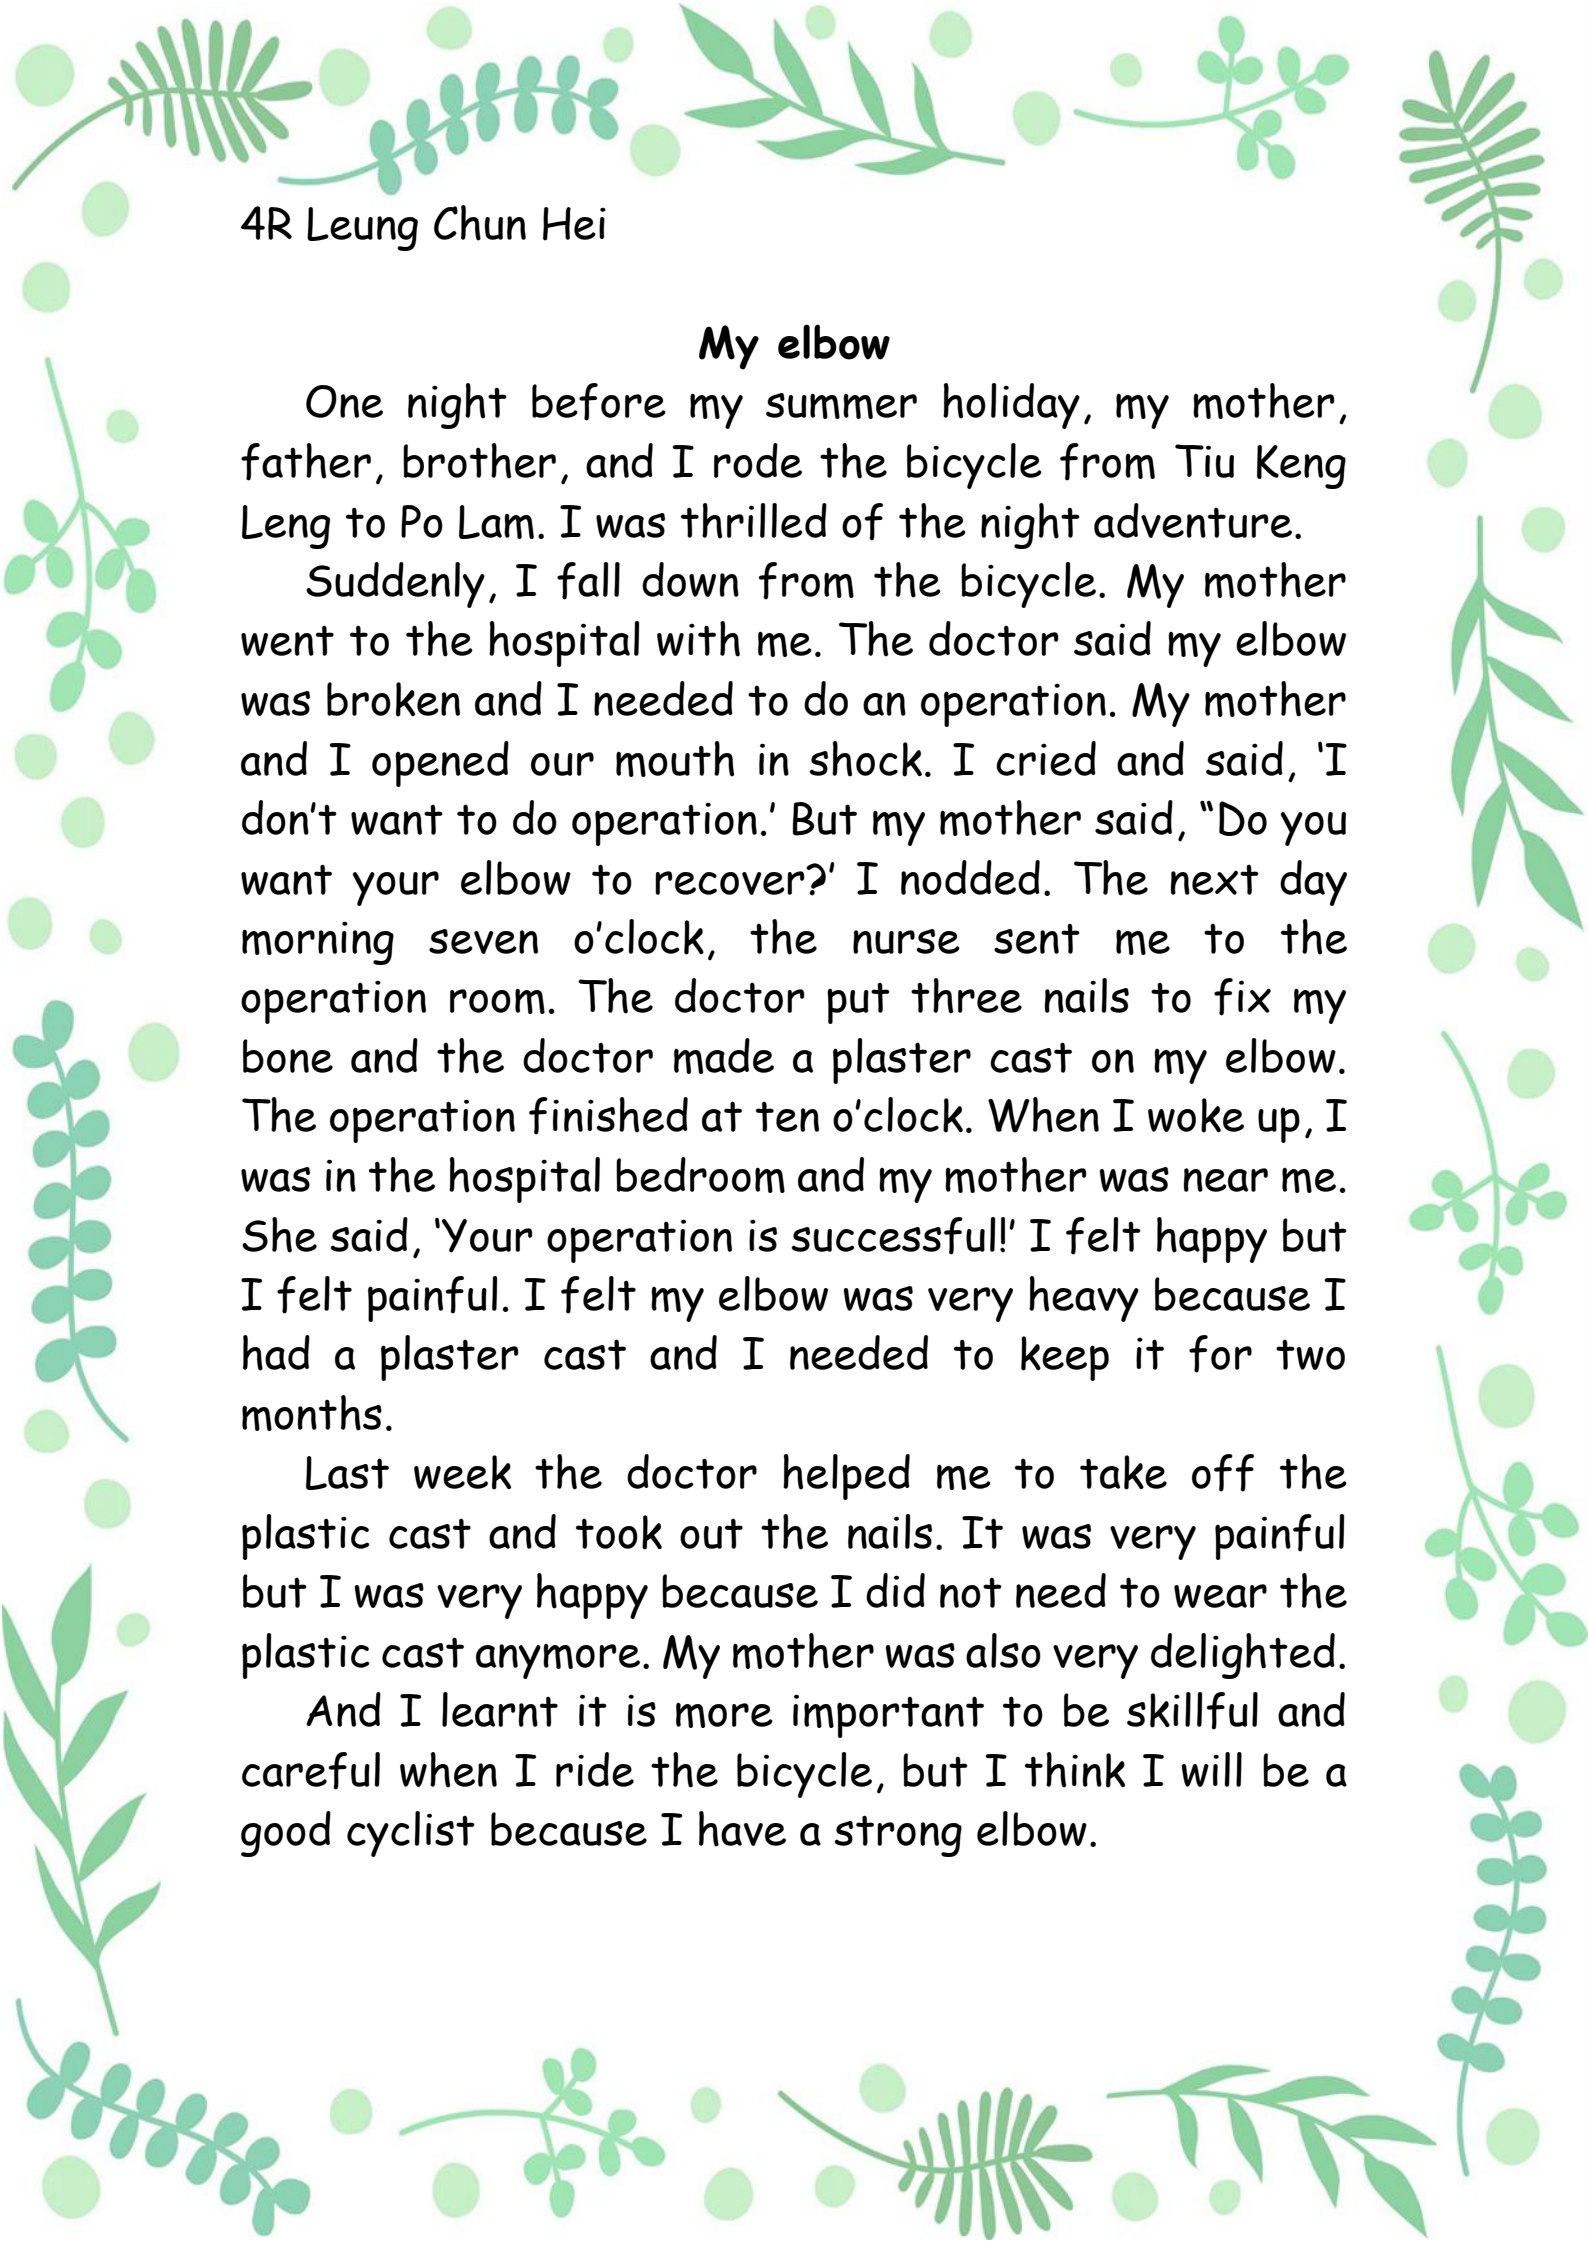

I went to Thailand with my family for 11 days in July. It was unforgettable.

We lived in a huge villa with a big swimming pool. We had BBQ at night. We swam every day.

We went to the zoo and fed the elephants. They were cute. They could use their noses to paint.

We also went to the water park. There were many exciting slides. I played many times. I was not afraid and I felt excited.

I really want to go to Thailand again. I have to thank my mum and dad.

My elbow

One night before my summer holiday, my mother, father, brother, and I rode the bicycle from Tiu Keng Leng to Po Lam. I was thrilled of the night adventure.

Suddenly, I fall down from the bicycle. My mother went to the hospital with me. The doctor said my elbow was broken and I needed to do an operation. My mother and I opened our mouth in shock. I cried and said, 'I don't want to do operation.' But my mother said, "Do you want your elbow to recover?' I nodded. The next day morning seven o'clock, the nurse sent me to the operation room. The doctor put three nails to fix my bone and the doctor made a plaster cast on my elbow. The operation finished at ten o'clock. When I woke up, I was in the hospital bedroom and my mother was near me. She said, 'Your operation is successful!' I felt happy but I felt painful. I felt my elbow was very heavy because I had a plaster cast and I needed to keep it for two months.

Last week the doctor helped me to take off the plastic cast and took out the nails. It was very painful but I was very happy because I did not need to wear the plastic cast anymore. My mother was also very delighted.

And I learnt it is more important to be skillful and careful when I ride the bicycle, but I think I will be a good cyclist because I have a strong elbow.
