

5S Chan Wang Sui

I went to Shenzhen during the Chinese New Year holiday with my family. We played in Shenzhen for two days.

On the first day, we went to Shenzhen by high speed rail and it was so fast. We just used five minutes to travel from Hong Kong to Shenzhen. When we arrived at Shenzhen, we went to the hotel to check in first. Then, we took some rest and went to a shopping centre for window shopping. At six o'clock, we went to a skating park. I played on an ice slide and I used my hand to touch the snow and it was very cold and we played for about two hours and had dinner afterwards.

On the next day, we went to drive go-kart. The car was very fast and the ride was exciting. Although I crashed, it was so much fun. In the afternoon, we went to a shopping mall again to look for bargains. At last, we returned to Hong Kong.

I want to visit Shenzhen once more because it was fun.

A Zhuhai trip

Last Wednesday and Thursday, I went to Zhuhai with my friend and our parents.

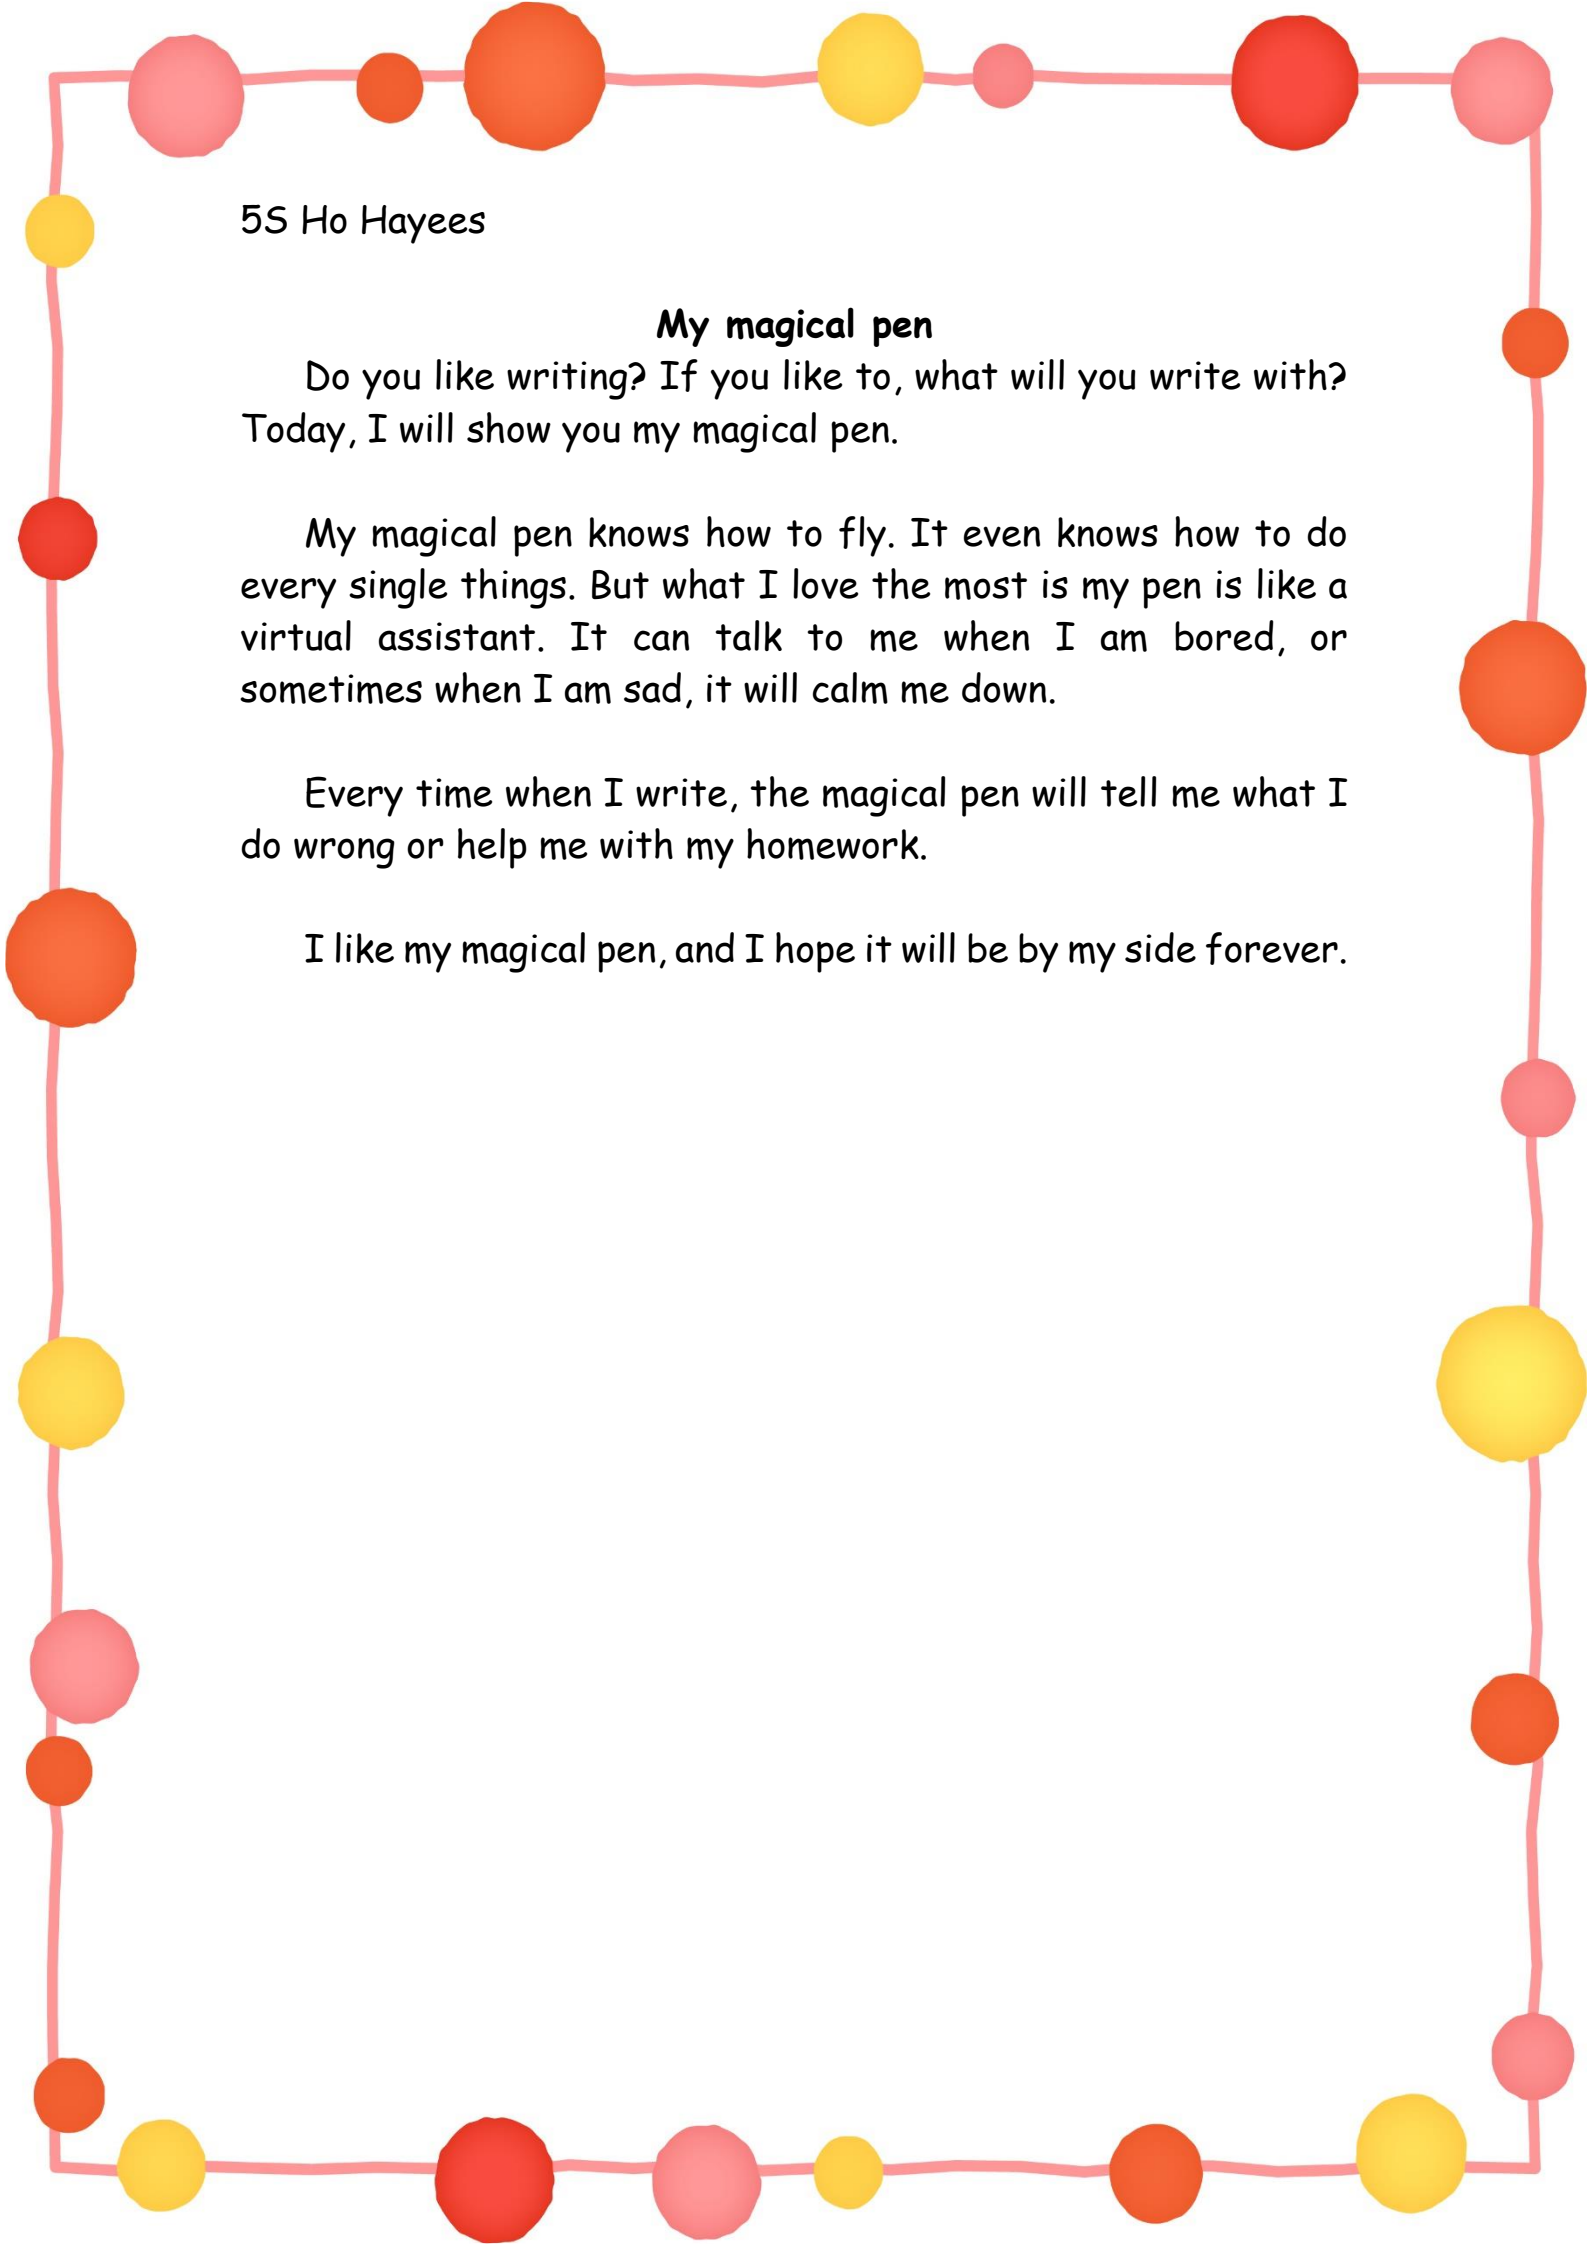

First, my friend, our parents and I checked in at Imperial Hot Spring Hotel. Our room was huge and well-equipped. There were a bunk bed and a double bed.

Then, my friend and I went to the hot spring in the hotel. There were different kinds of hot springs, like honey hot spring, milk hot spring and monk fruit hot spring. I felt comfortable and relaxed being soaked in the hot water.

At night, we had a buffet dinner. The food was mouthwatering there. After that, we went to ignite fireworks. It was such an interesting experience to me because I couldn't ignite any fireworks in Hong Kong.

On the next day, me, my friend and our parents went to eat Haidiliao. It was my first time to have meal in Haidiliao. There were some amazing performances, like Sichuan Opera face changing performance. It was very fascinating.

Although I had sore throat and suddenly lost my voice on the next day, it was still a memorable trip to me. I hope I can have another trip in Zhuhai again soon.

My magical pen

Do you like writing? If you like to, what will you write with? Today, I will show you my magical pen.

My magical pen knows how to fly. It even knows how to do every single things. But what I love the most is my pen is like a virtual assistant. It can talk to me when I am bored, or sometimes when I am sad, it will calm me down.

Every time when I write, the magical pen will tell me what I do wrong or help me with my homework.

I like my magical pen, and I hope it will be by my side forever.

A visit to Singapore

Last week, my parents and I went on a trip to Singapore. On the third day of the trip, we visited the Singapore Zoo.

It was a bright and sunny day. I was excited when we arrived at the Zoo. There were trees and flowers everywhere. First, we took a train to get around the Zoo. During the ride, I saw various kinds of animals, such as tigers, zebras, lions, hippos, crocodiles and kangaroos. It was interesting.

Then, we went to 'Wild Africa' to feed the giraffes. I fed them with some carrots. I was surprised to see their purple tongues. They looked cute. After that, we watched a dolphin show. The dolphins jumped high to reach a ball. They danced in the water. The show was wonderful. I was delighted.

We had a great time in the Singapore Zoo. It was the best zoo I ever visited. I learnt a lot about the animals. I look forward to visiting the zoo in Singapore again next time.

A scary wasp in the classroom

It was a sweltering Monday afternoon, my classmates and I were having our English lesson. The hot weather made me sweat a lot and also made me feel drowsy, I was dozing off as the lesson went on.

Suddenly, a piercing scream ran out. My class were pointing at the window, they were distracted by a wasp! We first thought it was a bee, until the teacher told us that it was a wasp. Everyone was scared because in science class the teacher taught us the dangerous things that a wasp can do that is they can sting people. So, basically, everyone was screaming and hiding under their table.

Luckily, the teacher opened the door, and the wasp finally flew out of the classroom and never came back. We were all relieved.

At last, I learnt that in dangerous situations we should stay calm and think a solution to solve the potential problems.
